B Installation
The ATEN VK430 RBS Panel comes preinstalled with a wall mount. It is also compatible with any VESA-compliant (75 x 75 mm) mounting accessory. Follow the steps below to install and mount the VK430 onto a wall.
1 Secure the 2 LED bars onto the sides of the VK430 using the 4 LED bar screws provided.
2 Slightly bend the mounting plate outward to detach it from the VK430.

4 Using an Ethernet cable, connect the unit's LAN port to a PoE injector to provide power and access to the network.
5 Place the VK430 onto the wall by sliding and attaching it to the mounting plate.
6 Turn on the unit by switching its power switch to ON. The status shall light green.
