

Thank you very much for selecting Autonics products. For your safety, please read the following before using.

### Caution for your safety

\*Please keep these instructions and review them before using this unit.

\*Please observe the cautions that follow;

**∆Warning** Serious injury may result if instructions are not followed ▲ Caution Product may be damaged, or injury may result if instructions are not followed.

XThe following is an explanation of the symbols used in the operation manual. ▲Caution: Injury or danger may occur under special conditions.

### 

1. In case of using this unit with machinery(Ex: nuclear power control, medical equipment ship, vehicle, train, airplane, combustion apparatus, safety device, crime/disaster prevention equipment, etc) which may cause damages to human life or property, it is required to install

may cause a fire, human injury or damage to property.

- 2. This unit is not safety sensor protecting from damages of property or injury from dangerous 2. This unit is not safely sensor protecting from damages of property or injury from dangerous parts of mechanical equipment, but it is the sensor detecting a normal object or irruption into the working area regardless of safety.

  3. Do not use it as safety equipment for the cutter or press.

  4. This unit does not follow any international safety standard.

  Check the safety standard of the country the product is used.

- Please note that we do not take any responsibilities for the problem related to overseas' laws or <Product liability(PL)> is happened by using as follows;
   Safety equipment for protecting a hand or other parts of worker at dangerous area.

②Interlock on mechanical equipment.

3 Safety sensor on mechanical equipment for stopping it when detecting a hand or other parts of worker (4) Using for detecting a hand or other parts of worker at dangerous area and controlling door or window.

**▲** Caution

#### 1. This unit shall not be used outdoors.

It might shorten the life cycle of the product or cause electric shock.

Use this product inside only. Do not use the product outdoors or location subject to temperatures or humidity outside. (Ex: rain, dirty, frost, sunlight, condensation, etc.)

2. Do not wire this in power ON status.

- 3. Use this unit in the rated specifications
- It may cause malfunction or the life cycle shorter.

  4. Use ground Frame Ground(F.G.) terminal when supplying power by switching power.

  5. Avoid using this unit where there are fluorescent light with high frequency, high speed start or signal light affecting to sensing ability.
- 6. It may do not able to shade the light by reflecting from surface of a wall when installing it in

- 0.3m from wall or flat parts. Please keep < Installations >.

  7. It may cause malfunction from interference when using them closely in parallel. Please keep < Installations >. 8. Install an emitter and a receiver in the same direction. The emitting light is not transferred to
- receiver if installed in opposite direction. 9. Avoid using this unit where there are severe vibration.
  It may cause a fire and malfunction.

  10. In cleaning the unit, do not use water or an oil-based detergent.

- 11. Make power and output line shorten as possible, or it may cause malfunction by surge etc.

- 9	○ Ope	ration mode switch			
	No.	Function	Switch OFF	Switch ON	
	Selection of transmission frequency F		Frequency A	Frequency B	
	2	Light ON/Dark ON selection	Light ON operation	Dark ON operation	
	3	Selection light/flashing for Job indicator	Job indicator light	Job indicator flashing	
ı	4	Selection of JOB/TEST	NORMAL mode	TEST mode	

## ■ Timing diagram operation

XThe waveforms of operation indicator, job indicator, and control output are the state of operation for Light ON, but in case of Dark ON, it is opposite operation against Light ON mode

# **■** Indicators display

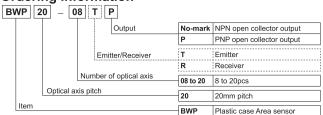

_ maioatoro aro	Pias						
	Emitter			Receiver			
Item	Indicator		Indicator			Control	
Item	Green	Yellow	Job indicator	Green	Red	Job indicator	output
Power ON	≎	•	_	_	I-	_	-
FREQ. A operation	Ф	•	_	_	I-	<b>-</b>	-
FREQ. B operation	≎	≎	_	_	-	_	-
TEST	<b>(</b>	•	<b>\rightarrow</b>	Ċ.	•	Φ	OFF
Stable light ON	_	I-	•	≎	≎	•	ON
Unstable light ON	_	T-	•	•	≎	•	ON
Unstable light OFF	_	_	≎	•	•	♦	OFF
Stable light OFF	_	T-	≎	≎	•	♦	OFF
Flashing function ON	_	_	•	≎	•	0	OFF
Synchronous line malfunction	_	I-	⇔	<b>(</b>	•	⇔	OFF
Over current	_	1-	Ċ.	1	0	₩	OFF

Display classification list Lighting Light out Flashing by 0.3sec. Flashing simultaneously by 0.3sec. ⑥ Cross-flashing by 0.3sec.

\*The operation of 'Operation indicator(red)' 'Job indicator (red)', 'Control output' is for Light ON, in case of Dark ON, it is opposite operation against Light ON. (in case, malfunction of synchronous line and over current, control output is OFF

regardless of the mode.) 🖔 Las especificaciones anteriores pueden cambiar sin previo aviso o unos modelos pueden suspenders

#### Ordering information

※ ☐☐☐☐ This information is intended for product management. (no need to refer when selecting a model)

### Specifications

Model	NPN open collector output	BWP20-08	BWP20-12	BWP20-16	BWP20-20		
iviodei	PNP open collector output	BWP20-08P	BWP20-12P	BWP20-16P	BWP20-20P		
Sensing type		Transmitte beam type					
		0.1 to 5m					
Sensing	target	Opaque materials of min. Ø30mm 20mm					
Optical	axis pitch						
Number	of optical axis	8EA	12EA	16EA	20EA		
Sensing	width	140mm	220mm	300mm	380mm		
Power s	upply	12-24VDC ±10%(ripple P-P: max. 10%)					
Protecti	on circuit	Built-in					
Current	consumption	Emitter: Max. 80mA, Receiver: Max. 80mA					
Control output		NPN or PNP open collector output  Load voltage: Max. 30VDC Load current: Max. 150mA Residual voltage - NPN: Max. 1V, PNP: Max. 2.5V					
Operation	on mode	Switching of Light ON/Dark ON by switch					
Short-circuit protection		Built-in					
Respon	se time	Max. 6ms(frequency B selection is max. 7ms)					
Light so	urce	Infrared LED(850nm modulated)					
Synchronization type Interference protection		Timing method by synchronous line					
		Interference protection by transmission frequency selection					
Environ-	Ambient illumination	Sunlight: Max. 10,000lx (received light side illumination)					
ment	Ambient temperature	-10 to +55°C, storage: -20 to +60°C					
mont	Ambient humidity	35 to 85%RH, sto					
	esistance	±240V the square wave noise(pulse width 1μs) by the noise simulator					
	ic strength	1,000VAC 50/60Hz for 1minute					
	on resistance	Min. 20MΩ(at 500VDC megger)					
Vibration		1.5mm amplitude at frequency of 10 to 55Hz in each of X, Y, Z directions for 2 hours					
Shock		500m/s²(50G) in each of X, Y, Z directions for 3 times					
Protection		IP40(IEC standard)					
Material		Case: PC/ABS, Sensing part: PMMA					
Cable		Ø3.5mm, 4-wire, Length: 3m(emitter: Ø3.5mm, 4-wire, length: 3m) (AWG24, core diameter: 0.08mm, number of cores: 40, insulator diameter: Ø1mm					
Approva	al	CE					
Weight <sup>*1</sup>		Approx. 480g (approx. 280g)	Approx. 520g (approx. 320g)	Approx. 620g (approx. 360g)	Approx. 680g (approx. 430g)

In the receiver OUT(Black) line and the emitter JOB(Black) line are not connected each other.

In the receiver OUT(Black) line and the emitter of the line and the li indicator of the emitter is not operated and maintains the light status

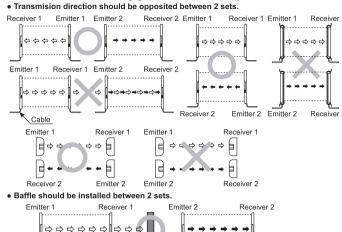

#### Installations

For direction of installation same up/down direction.

For protection of interference

- t may cause interference when installing more than 2 sets of the sensor. In order to avoid the interference of the sensor, please install as following figures and use the interference protection function.

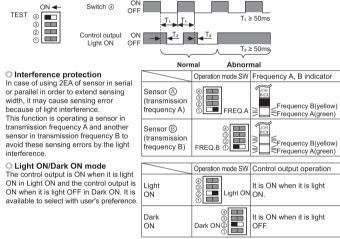

• it silould be ilistal	ied out of the lift	erierence distan	ce.	
Emitter 1	Receiver 1			
	D C C C	Sensing distance (L)	Installation allowable distance (D)	
Emitter 2	Receiver 2	0.1 to 1m	Min. 0.2m	
		Min. 1m	Min. 0.3m	
<b>→</b> → → ⊢ L(r	→ → →	XIt may be a little environment.	e different based on installation	n

#### Functions

TEST(stop transmission function)
When selecting TEST mode, emit is stopped and green&yellow LED of emitter flashes. It is available to check whether sensor operates properly with stopping the transmission in TEST mode. It is changed to light OFF status when emit the transmission is stopped, control output is OFF in Light ON mode and ON in Dark ON mode. . Control output pulse by TEST input

ON ◀ Switch @

Switching of Lighting/Flashing of Job indicator
Job indicator is lighting or flashing to make out work sensing operation more

easily.

Operation mode SW Job indicator operation Liahtina Lighting indicator lashing Flashing indicator

## Troubleshooting

Malfunction	Cause	Troubleshooting
	Power supply	Supply rated power.
Non-operation	Cable incorrect connection or disconnection	Check the wiring.
	Rated connection failure	Use it within rated sensing distance.
Non-operation	Pollution by dirt of sensor cover	Remove dirt by soft brush or cloth.
in sometimes	Cable connection failure	Check the assembled part of the cable.
Control output	Out of rated sensing distance	Use it within rated sensing distance.
Control output is OFF even though there is not a target object.	There is an obstacle to cut off the light emitted between emitter and receiver	Remove the obstacle.
	There is a strong electric wave or noise generator such as motor, electric generator, high voltage line etc.	Put away the strong electric wave or noise generator.
LED displays for synchronous line	Synchronous line incorrect connection or disconnection	Check the wiring.
malfunction	Break of synchronous circuit of emitter or receiver	Contact our company.
LED displays for	Control output line is shorten	Check the wiring.
over current	Over load	Check the rated load capacity.

Caution for using

- Please make the interval enough between 2 sets or exchange the positions of emitter and receiver in order to remove interference as occurring interference by the emitter of another set when using emitter/receiver more than 2 sets closely.

  2. Please install this sensor at proper height(min. approx. 0.3m) from flat part because malfunction may be caused due to certain amount of light received by light reflected when installing it close to flat part.

  3. Avoid using this unit where there are fluorescent light with high frequency, high speed start or signal light affection to sensing ability.
- light affecting to sensing ability.

  4. Please use a single conduit or separated wiring as it may cause malfunction or mechanical problem

- 4. Please use a single conduit or separated wiring as it may cause malfunction or mechanical problem when installing the wiring of the sensor with high voltage lines.

  5. Avoid using this unit where there are places with corrosive gas or dust, or it may cause malfunction.

  6. Please make power and output line shorten as possible, or it may cause malfunction by surges etc.

  7. Please clean the sensor cover with dry cloth when it is stained by dirt etc., but do not use organic materials such as thinners.

  8. When using switching mode power supply as the source of supplying power, Frame Ground (F.G.) terminal shall be grounded and a condenser for removing noise grounded and a condenser for removing noise shall be installed between

0V and F.G. terminal. 9. Installation environment ①It shall be used indoor ②Altitude max. 2,000m ③Pollution degree 2 ④Installation category II XIt may cause malfunction if above instructions are not followed.
