Over-Engineered, Not Overpriced

Aven listened to its customers about improving the original and beloved Cyclops. We now introduce the Cyclops 2, which combines the dual USB and HDMI outputs of the original Cyclops, but now users have the ability to save images/video directly to the included SD card, no computer required! The dual USB and HDMI outputs may also be used at the same time on different monitors. Features high **magnification of 13x-140x**, new and improved imaging and measurement software, and the Cyclops remote for accessing on-screen settings, controlling the 30 LED ring light, and more.

Features:

- Micro SD card for saving images/video
- New and improved software and camera sensor
- New dual screen mode using HDMI and USB outputs
- 13x-140x magnification

Save images and video,
no computer required!

Fine focus adjustment

30 LED ring light

Easy cable management
