

HEPA® Harsh Enviro Filter

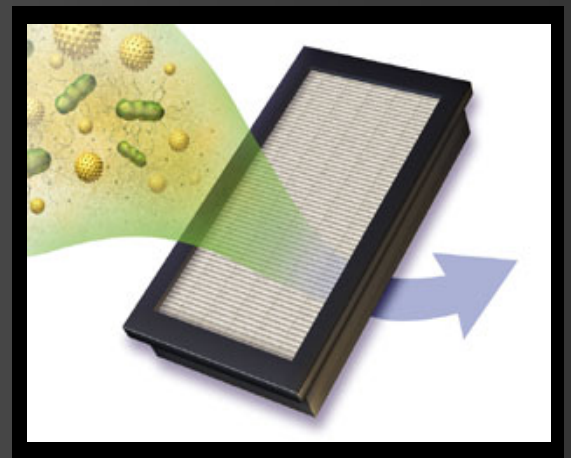

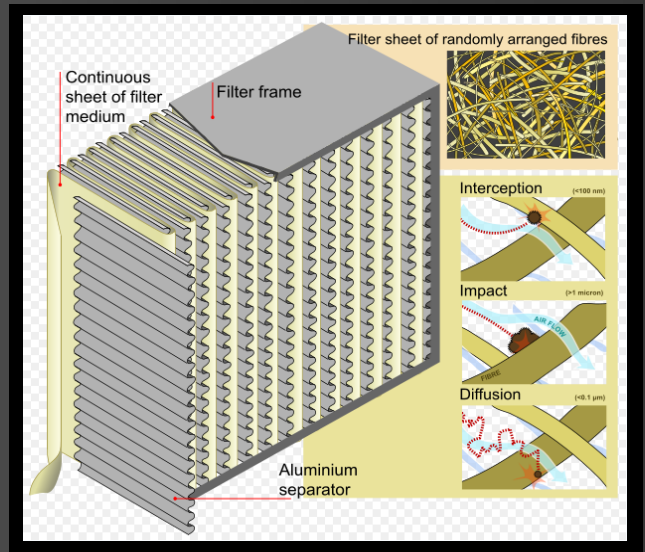

Anti Dust/Anti Smoke

What is HEPA®:

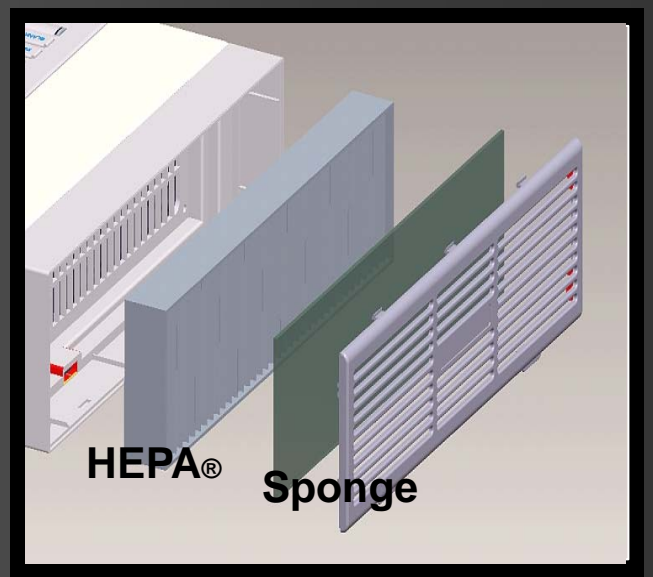

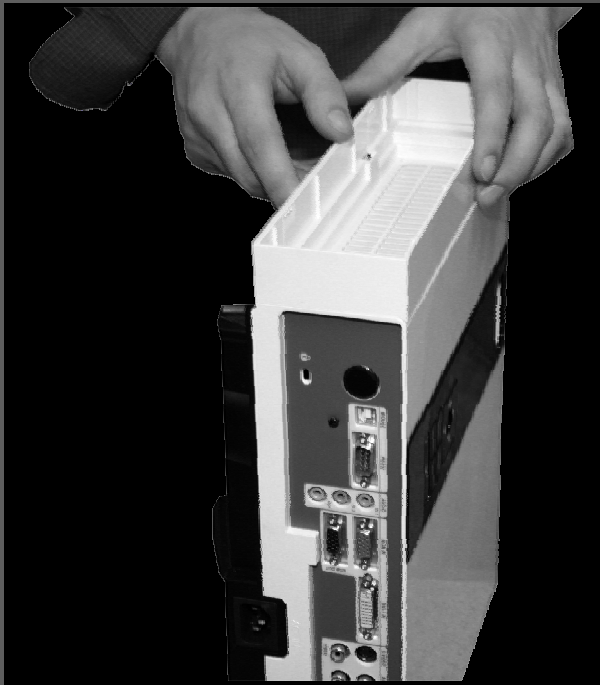

HEPA® stands for High Efficiency Particulate Air Filter. HEPA® filters are made up of a mat of randomly arranged fibers, designed to block and diffuse harmful particles.

Features of Harsh Enviro Filter:

- Double-layer/hybrid material - HEPA® filter combined with sponge filter enhances the effectiveness of the filter
- Get four-times the collection area with the HEPA® filter than a standard filter
- Increases the longevity of the projector and lamp
- Filters available for all Seattle models, MP65e, and Pro5000SL
- Filter protects against chalk dust, dust particles, smoke, and other debris

The harsh enviro filter stops polluted air from traveling through the projector
