# Uninterrupted Learning through Long-Lasting and Innovative Projection Solutions

**GLOBAL #1 DLP  
PROJECTOR BRAND**

Because it matters

# Strengthen Classroom Engagement with Digital Integration

Education is evolving quickly. Now tasked with handling a generation of digital native students who are different than any that came before, teachers and schools have their work cut out for them. Many schools are facing a transitional period in how they use technology. As the flipped classroom model becomes standard, schools will finally need to replace their old projectors with new technology. Since many schools have already adopted new display technologies, there is abundant information about which ones deliver the best results in the classroom.

As students change, so do teachers' needs. It's no longer enough for schools to have old technology that sits in storage and is only rolled out for the occasional presentation. Teachers nowadays need advanced tools that let them prepare materials that can be used both in class and at home on notebooks, tablets, and smartphones.

Technology, when used improperly, can be a huge interruption in class. A teacher with a typical course load will waste up to 2 hours every week because of outdated technology. Since switching between analog and digital teaching modes wastes class time and interrupts students' focus, teachers need equipment that can support them throughout the whole class. By implementing laser projectors with interactive screens, teachers can effectively use the screen as a whiteboard to facilitate smoother classroom interaction and widen the range of learning experiences.

Getting information from digital devices.

They often focus for less than 2 minutes

Having a preference for images over texts and they learn best from visual materials.

Digital natives, often referred to children born from 2003 onward, learn differently than their predecessors did. First of all, they are well accustomed to getting information through digital devices. Familiar tools help them feel more comfortable in class and can lead them to higher achievement. Secondly, students nowadays have

shorter attention spans than students from a decade ago. They often focus for less than 2 minutes at a time and it's difficult to regain their attention once it's gone, meaning up to 25% of their time in class goes to waste. Furthermore, digital natives have a preference for images over texts and they learn best from visual materials.

120MINS waste every week

# Three Things to Consider when Determining the Right Equipment

Using proper devices can unlock infinite possibilities in the classroom. By choosing display solutions that suit your school's classroom sizes and your teachers' needs, you'll empower your teachers to make education more fun and impactful than ever before. When discussing what display solutions to purchase, you can use the questions below as a starting point for making your choice.

## Q1 Are your display solutions clear and easy to read?

### The Facts

Research shows students learn up to 26% faster in a classroom with proper lighting.

Illegible texts take twice as long to get through.

Students lose up to 25% of potential learning time because they're not paying attention.

Digital natives prefer images to text. When images are of low qualities, learners quickly lose interest.

### Important Points to Consider

- ▶ When teachers turn off the lights to use a projector, do students lose focus and feel drowsy?
- ▶ Do students need to squint to see text and images clearly?
- ▶ Do students easily lose concentration whenever teachers switch to using the projector?

### How the BenQ Education Laser Projector Can Help

- ▶ Long-lasting color and brightness
- ▶ High resolution for focus-boosting clarity
- ▶ High brightness for well-lit environments
- ▶ Image uniformity enhancement
- ▶ High contrast ratio for enhanced readability

## Q2 Do teachers have the tools they need for smooth teaching?

### The Facts

2 hrs

Teachers waste 2 hours every week dealing with IT issues

New equipment is more user friendly than old technology

Fewer IT issues means less downtime when students can get distracted

Smoother teaching flow means less time wasted in the classroom

### Important Points to Consider

- ▶ Do teachers frequently waste time fiddling with old equipment?
- ▶ Do teachers have the tools to properly implement a flipped classroom?
- ▶ Are projectors compatible with the personal devices that teachers and students use?
- ▶ Can your projectors switch among different signal sources quickly without wasting time and losing students' attention?

### How the BenQ Education Laser Projector Can Help

- ▶ Instant power on/off
- ▶ Projection onto any surface
- ▶ Multi-touch & multi-screen drawing for enhanced interactivity
- ▶ QCast Wireless Solution for easy BYOD collaboration

## Q3 Are your displays optimized to help students learn?

### The Facts

Determine the ideal display solution for classrooms, lecture halls, gymnasiums, or other venues depend on the size of the room and the number of students

In a standard classroom, students in the back may have trouble reading text on a standard 65" display

Ideally, a display solution should create images that are clear from the back corners of the room

The IEC class I/RG2 certified laser light source can ensure user safety under all normal conditions.

### Important Points to Consider

- ▶ Are some of your students unable to join the discussion because they can't see the screen clearly?
- ▶ Do you need display solutions that can work in many different room sizes?

### How the BenQ Education Laser Projector Can Help

- ▶ Ultra short throw projection
- ▶ Big zoom for unrivalled installation flexibility
- ▶ High brightness for clear images even in large rooms

In addition to the questions above, here are a few other things to consider:

Projectors with dustproof technology can cut maintenance costs by one third.

Laser projectors are lamp-free and can operate for 20,000 hours without requiring replacement, resulting in lower operating costs.

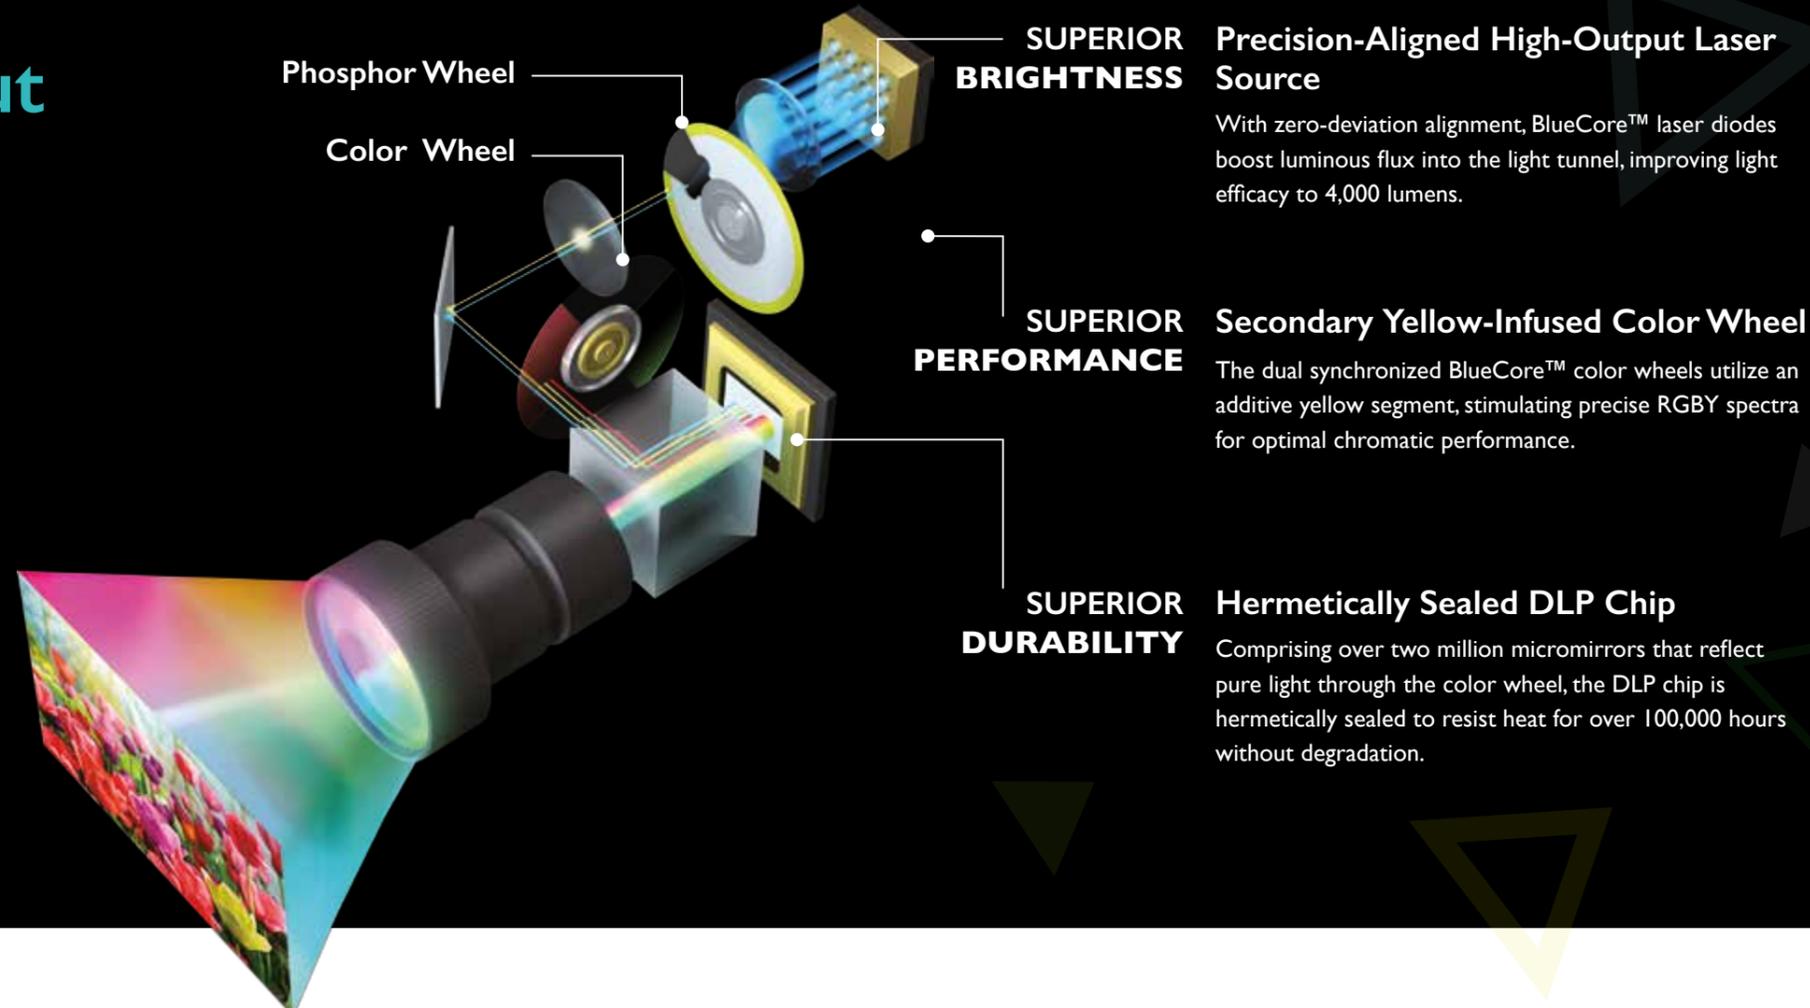

DLP projectors offer long-lasting color and image quality that will improve students' learning.

# Smooth Learning Without Interruptions

**BLUE CORE**  
LASER

## Long-Lasting Color & Brightness for Supreme Performance

Students who see better learn better. Harnessing the power of the BlueCore™ laser technology, BenQ education laser projectors can deliver vastly improved color saturation and brilliancy when compared to lamp-based projectors of the same lumen output. Improved legibility and clearer images will boost students' learning outcomes and provide a smoother classroom experience for everyone.

**SUPERIOR BRIGHTNESS**

**Precision-Aligned High-Output Laser Source**

With zero-deviation alignment, BlueCore™ laser diodes boost luminous flux into the light tunnel, improving light efficacy to 4,000 lumens.

**SUPERIOR PERFORMANCE**

**Secondary Yellow-Infused Color Wheel**

The dual synchronized BlueCore™ color wheels utilize an additive yellow segment, stimulating precise RGBY spectra for optimal chromatic performance.

**SUPERIOR DURABILITY**

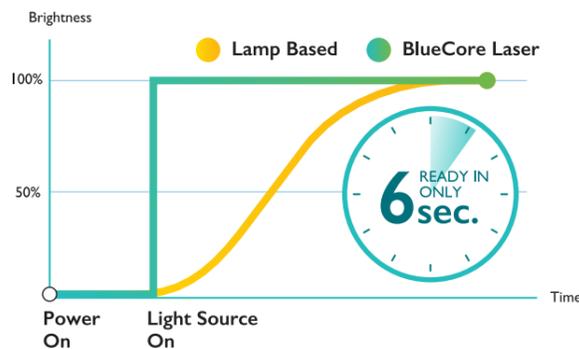

**Hermetically Sealed DLP Chip**

Comprising over two million micromirrors that reflect pure light through the color wheel, the DLP chip is hermetically sealed to resist heat for over 100,000 hours without degradation.

### Instant Power On/Off

#### Effectuates Ideal Control of Class Rhythm

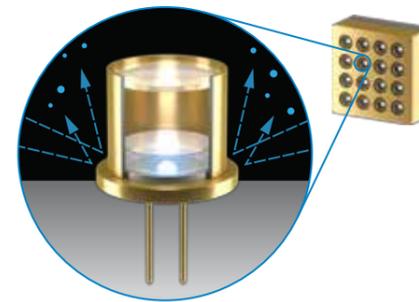

Superior than conventional lamp projectors that require warm up and cool down time, BenQ education laser projectors turn on and off instantly to save valuable time for lectures and important instructional presentations.

### Sealed Laser Bank

#### Preserves Enduring High Brightness

BlueCore™ laser diodes are fully sealed and mounted in the laser bank, completely preventing dust entry to minimize brightness decay for long-lasting high brightness.

### Sealed Engine for Laser Light Source

#### Ensures Performance of 20,000 Hours

With a fully sealed laser light source and an innovative sealed engine design empowered by BenQ's Dust Guard™ technology, BenQ education projectors guarantee 20,000 hours of maintenance-free operation, which prevents extra expenses on lamp replacement and maintenance. The laser light source can resist brightness decay and make BenQ laser education projectors highly stable while ensuring high brightness performance after years of usage.

### IEC Class 1 / RG2 Standard Ensures Laser Safety under All Normal Conditions

BenQ education laser projectors comply with International Electro-technical Commission's (IEC) Class 1 / RG2\* standard. The laser beam from BlueCore™ laser diodes passes through two special diffuser lenses, converting the point light source into a surface light source, which means that they are incapable of causing damage under normal operating conditions even when the laser beam is directed into the eye.

\* Class 1 (comply with IIEC 60825-1:2014)+ RG2 (comply with IEC 62471-5:2015) Standard: Available on LU950/LH890UST/ LW890UST/ LX890UST/ LW820ST/ LX820ST/LX770/LH770/ LX720/LW720/LH720

\* RG2 (Risk Group 2): Hazard level associated with illumination RG2 means no out of the ordinary safety procedures are required.

# Optimize Learning with Long-Lasting and Durable Brightness

## Comprehensive Dustproof Solutions for Optimal Performance and Reliability

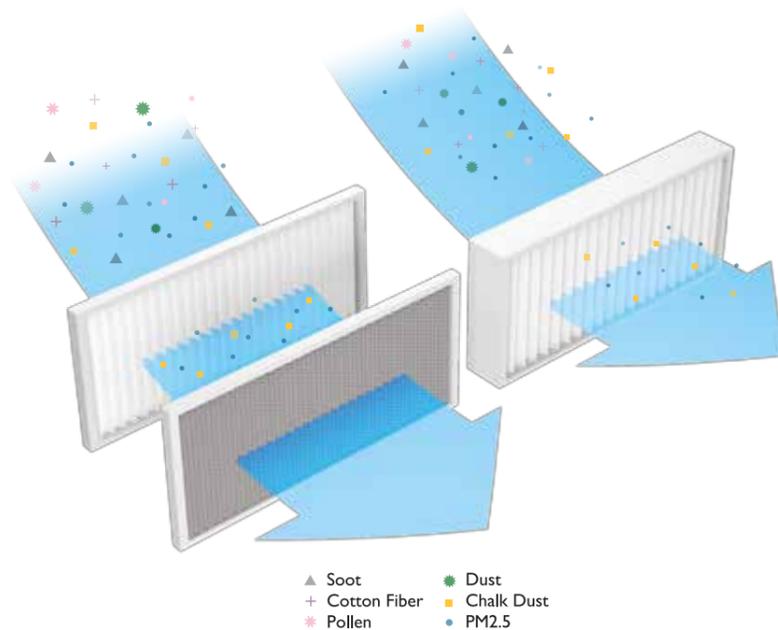

BenQ's Dust Guard™ technology incorporates the latest sealed optical engine design, color wheel sensor, and high performance dust filters to block out up to 99% of dust and particles. Built to offer long-lasting performance, BenQ Education Laser Projectors can enhance students' attention spans and boost teaching performance. Their sealed optical path design also guarantees superb image quality and stable operation even in dusty environments.

### ➤ Dust Filters

#### Block 90% of Particles and PM2.5

BenQ Dust Guard™ employs advanced dust filters to prevent intrusion of up to 90% of PM10 level particles such as pollen and dust, tremendously improving protection in dusty environments. Certain models under Dust Guard™ go further by employing two layers of filters to block chalk residue and particles up to the level of PM2.5 without restricting air flow. For added peace of mind, BenQ education projectors possess built-in Filter Timers that can remind users to replace filters and reset them after replacement.

### ➤ Sealed Engine

#### Completely Prevents Dust Entry

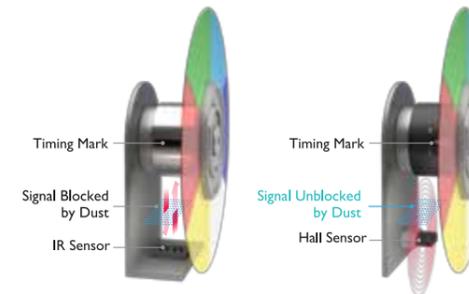

BenQ Dust Guard™ features a sealed optical engine that fully protects the DLP chip, color wheels, and light path components. It effectively eliminates common problems like color wheel sensor failures, visible spots on images, and color decay to significantly reduce service costs and downtime.

### ➤ Hall Sensor

#### Proves Invulnerable to Dust Accumulation

BenQ Dust Guard™'s hall sensor is significantly more dust-resistant than traditional sensors, with uncompromised functionality even when levels of dust deposits are 7X\* higher than normal. The hall sensor utilizes magnetic signals for timing, which is invulnerable to dust accumulation. Even in severe environments with possible dust accumulation, the hall sensor signal can still effectively distinguish colors for precise alignment and uninterrupted projection.

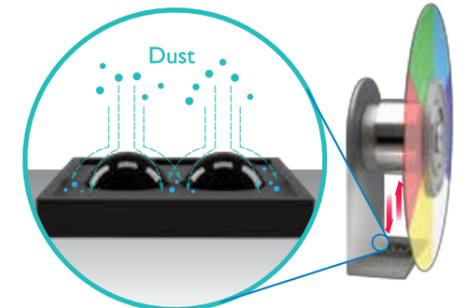

\*When used in the same environment, the hall sensor maintains normal functionality even after having 40g of sand inside, whereas traditional sensors lose their detection capacity after having 6g of sand inside.

### ➤ Anti-Dust Accumulation Sensor

#### Resists Dust Buildup

Incorporating color wheel sensors with an ingenious anti-dust accumulation feature, BenQ Dust Guard™ prolongs optimal performance by repelling dust which can accumulate on traditional sensors to block the IR signal and cause flickering, abnormal colors, or even shutdowns.

BenQ DLP Projectors	Core Technology	Corresponding Level Of Pollution	Dustproof Protection Rating	Range Of Blocked Particles	Brightness & Color Performance	Reliability Image Blemish Prevention	Maintenance Cost Saved
	Expert Dustproof System with the fully sealed engine design	Middle to High Pollution (AQI: 150+)	IP5X	PM2.5/ Chalk Dust/ Cotton Fiber/ Dust/ Hair	★★★★★	★★★★★	★★★★★
	Premium Dustproof System with dust-resistant and filtering design	Low to Middle Pollution (AQI: 50-150)	IP5X	Cotton Fiber/ Dust/ Hair	★★★★	★★★	★★★★
BenQ Education Projectors	Advanced Dustproof Solution with anti-dust accumulation components	Normal Air Quality (AQI: 0-50)	N/A	N/A	★★★	★★★	★★★

# DLP Technology for Lasting Image Quality for Today and Tomorrow

## ➤ DLP Technology Strengthens Projected Image Quality

### Long-Lasting Picture Quality

With a sealed engine design that protects the DLP chip from dust-induced image degradation and the industrial-grade durability of DLP projection technology, BenQ education projectors are capable of maintaining long-lasting picture quality by preventing color decay. Unlike non-DLP projectors, BenQ education projectors deliver premium picture quality equivalent to the results from brand new projectors after lamp replacement.

#### Non-DLP Projector

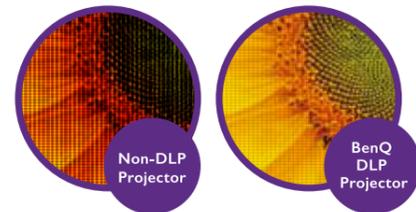

#### BenQ DLP Projector

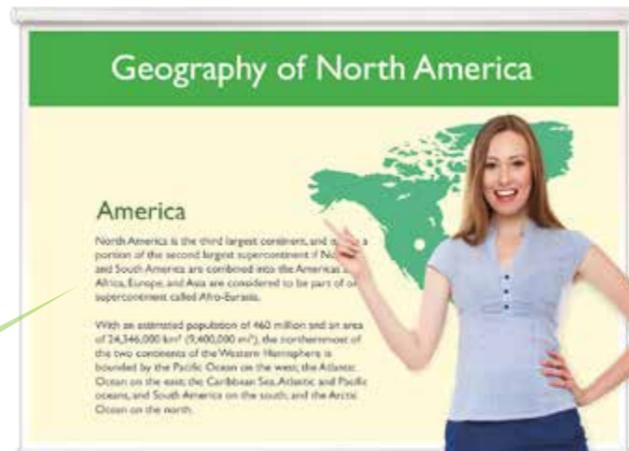

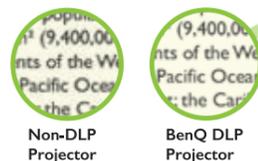

### High Pixel Fill Factor for a Superb Viewing Experience

BenQ DLP projectors feature the class-leading high fill factor, minimizing black borders around each pixel to eliminate the dreaded "screen door effect" commonly observed in non-DLP projectors. BenQ education projectors produce superior definition and clarity in small-size text and fine details for beautifully rendered images instead of pixelated graphics.

### High Contrast Ratio for Crisp Readability

Ideal for projecting text, numbers, and tables widely used in teaching materials, BenQ education projectors leverage the native DLP advantage of digitally controlled micro-mirrors on the DLP chip. By completely toggling off reflective micro-mirrors to generate deep true blacks, BenQ education projectors create high native contrast ratio for sharp readability and crisp resolution at every single sub-pixel.

## ➤ Striking Picture Performance Creates Memorable Lessons

### Spectacular High Brightness for Bright Lecture Room

BenQ's education projectors produce high ANSI lumen brightness and resolution for perfect projection performance with crisp images and sharp text even in bright lecture rooms. High brightness provides clear content under high ambient lighting, allowing lights to be kept on during classes for note taking and interactive collaboration.

### Image Uniformity Enhancement

BenQ's next-generation Total Internal Reflection (TIR) optical architecture eliminates uneven brightness distribution of conventional projection, precisely focusing the center and corners of the image to enhance corner uniformity by 30% and even out brightness uniformity for a smooth, comfortable viewing experience.

Image uniformity without TIR prism

Image uniformity with TIR prism

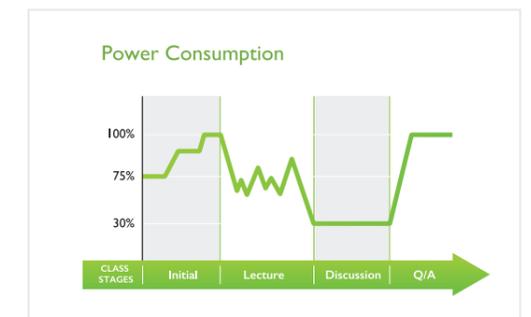

## ➤ Exclusive SmartEco™ Technology Maximizes Smart Educational Investment

### Extended Lamp Life up to 15,000 hours under Traditional Lamp Light Source

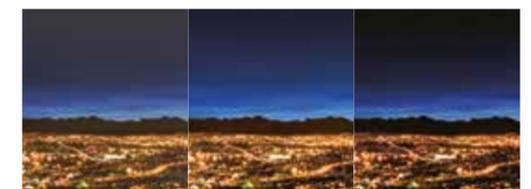

The exclusive BenQ innovation, SmartEco™ technology, intelligently modulates light output and perfects DLP's energy saving capabilities to increase lamp life with uncompromised brightness and exquisite picture quality. Reducing energy consumption, SmartEco™ extends lamp life up to 15,000 hours, 3X\* more than without SmartEco™ technology. The Eco Blank mode further increases energy saving capability by dimming lamp power automatically to lower total power by 70% when blanking the projection.

\*The lamp life under LampSave mode is three times longer than under Normal mode.

### Sharp Details in Dark Scenes

BenQ's exclusive SmartEco™ Technology ingeniously adjusts light output based on content, enhancing contrast to produce richer blacks and the best possible picture quality especially important for detailed and dynamic dark scenes such as astronomy courses.

Non-DLP without SmartEco

THE WORLD'S NO.1 DLP BRAND

# BenQ's Projection Solutions for Every Room In School

## LECTURE HALL

### ▶ Lecture Hall

#### Installation Projectors

- ▶ Ultra high brightness
- ▶ Big zoom
- ▶ Flexible lens shift
- ▶ HDBaseT compatibility
- ▶ Comprehensive LAN control

## INTERACTIVE CLASSROOM

### ▶ Interactive Classroom

#### (Ultra) Short Throw Projectors

- ▶ High brightness
- ▶ High resolution by (ultra) short throw
- ▶ Scalable for wireless and interactive capability

## MEETING ROOM

### ▶ Meeting Room

#### Wireless Solution

##### InstaShow™

- ▶ Intuitive wireless streaming with no software setup
- ▶ Powerful compatibility on any platform
- ▶ Reliably stable wireless connection

#### Network Projectors

- ▶ High brightness
- ▶ Big zoom
- ▶ LAN control
- ▶ Low-noise operation

##### QCast Mirror

- ▶ Screen mirroring with zero software
- ▶ Smooth high definition video quality
- ▶ Efficient OTA updates

## INTERACTIVE CLASSROOM

# Spark Limitless Possibilities

Easy to integrate and extremely scalable, BenQ education laser projectors are perfect fits for interactive teaching. Smart interactive tools and intuitive setup can strengthen teacher-student collaboration and classroom engagement.

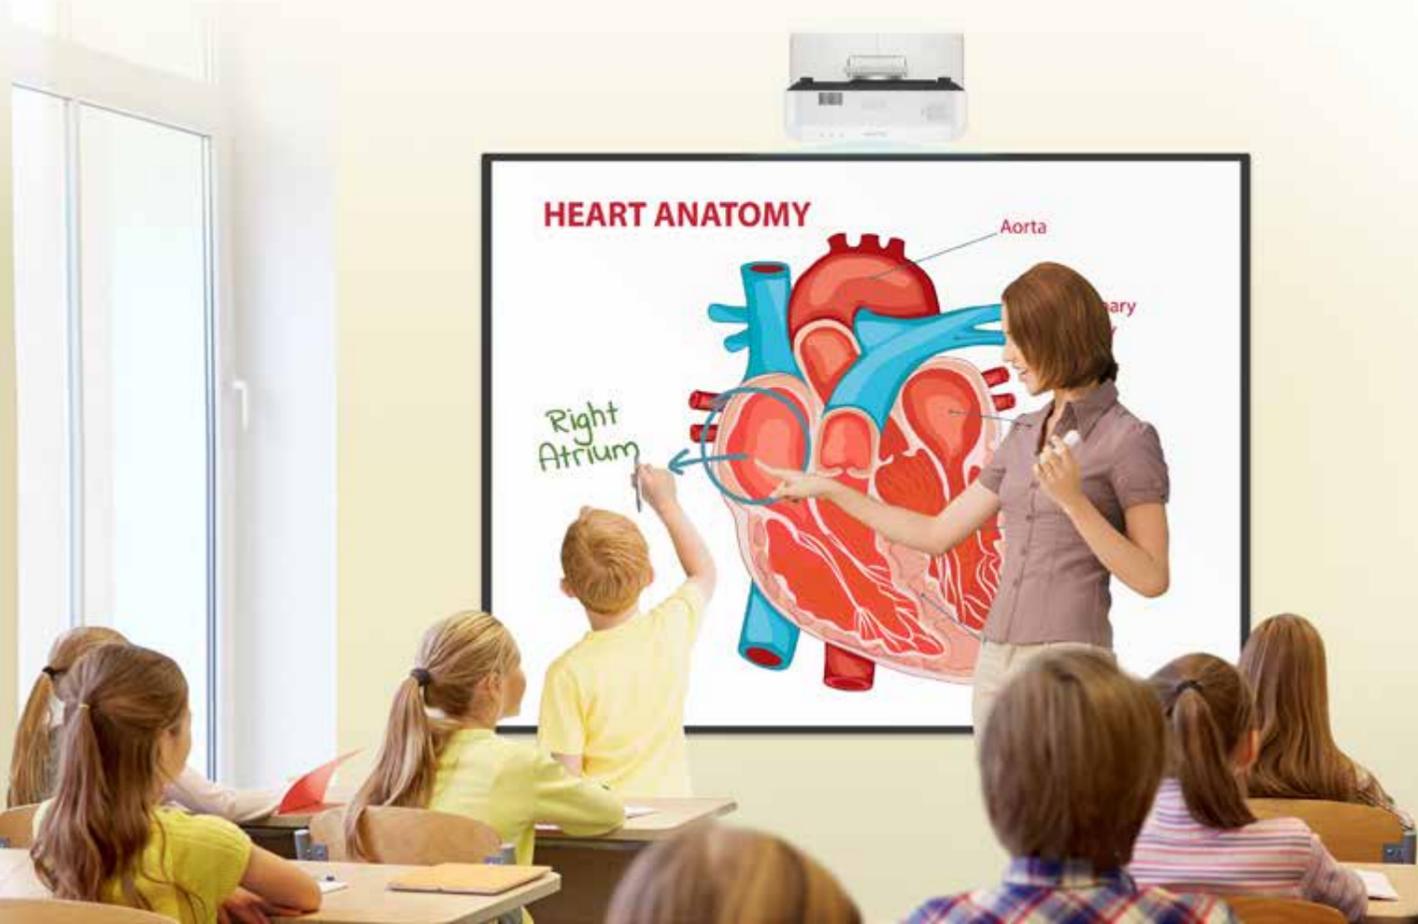

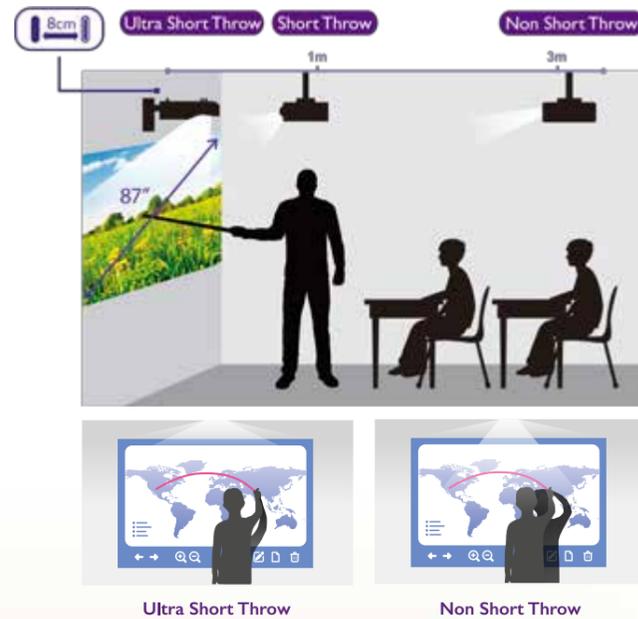

### Zero Space Constraints Enable Impactful and Engaging Instruction

#### Ultra Short Throw Projection

BenQ ultra short throw projectors can be mounted centimeters from the wall directly above the screen, eliminating distracting shadows and glare for students and teachers to engage and collaborate freely in front of the board.

\* Ultra Short Throw: available on LH890UST/ LW890UST/ LX890UST/ MW864UST/ MX863UST/ MH856UST/ MW855UST/ MX854UST/ MW843UST/ MX842UST

\* Short Throw: available on LW820ST/ LX820ST/ DX825ST/ DX808ST/ LX810STD/ MW826ST/ MX825ST/ MW809ST/ MX808ST

### Smart Interactive Tools Promote Collaborative Learning

#### Multi-Touch & Multi-Screen Drawing

With enhanced multi-touch capability for pens or fingers, two PointWrite™ projectors can be used in conjunction to double the interactive projection surface, creating vast new opportunities for interactive learning in modern digital classrooms. In QWrite Whiteboard Mode, teachers can also run different applications or display, view, and annotate across two surfaces.

#### Interaction on Any Surface

PointWrite™ technology transforms BenQ education projectors into collaborative platforms that turn any surface into an interactive whiteboard. Seamless integration of PointWrite™ kit and QWrite software with BenQ projectors encourages a truly collaborative learning environment where students and teachers work together using intuitive templates along with annotation tools.

#### Intuitive Setup

Reliably accurate in any ambient lighting, PointWrite™ auto calibrates and saves its settings immediately when plugged into a computer's USB port, remaining ready with no manual configuration or complicated training for teachers.

\* Available on LH890UST/ LW890UST/ LX890UST/ LW820ST/ LX820ST/ DX825ST/ DX808ST/ LX810STD/ MW864UST/ MX863UST/ MH856UST/ MW855UST/ MX854UST/ MW826ST/ MX825ST/ MW809ST/ MX808ST

### QCast Wireless Solution Strengthens Easy BYOD Collaboration

Apart from wired MHL support, BenQ education projectors are ready for BYOD collaboration and creating more engaging lessons via QCast wireless dongle that allows up to 4 participants to stream content from smart devices or computers to the big screen, displaying them in 4 split screens.

LECTURE HALL

# Optimal Visual Experiences and Seamless Integration

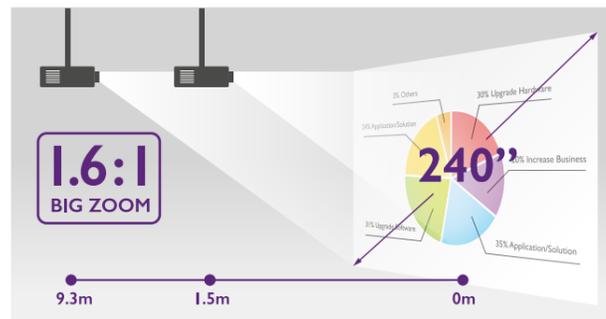

## High Brightness Ensures Superior Viewing Experiences in Large Venues

BenQ high-lumen projectors engage students with a superior viewing experience, even in brightly lit auditoriums, seminar rooms, and lecture halls.

## Versatile Adjustment Features Offer Installation Flexibility

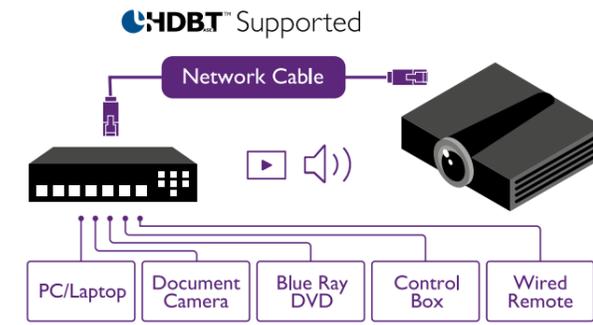

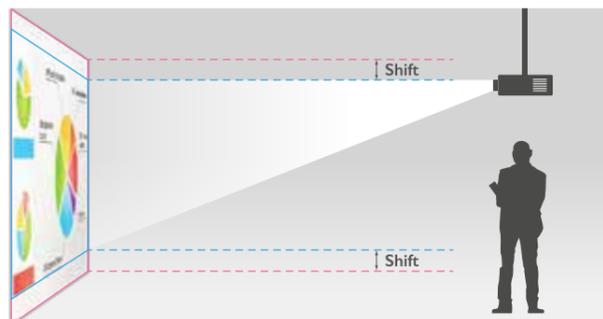

### Big Zoom

Big Zoom frees up space with an impressive range of throw distances and projects images up to 300" wide, enabling the flexibility of placing the projector anywhere without renovation or relocation of existing projector mounts.

### Lens Shift

To overcome installation obstacles and minor miscalculation during projector installation, the lens shift feature comes with the flexibility to adjust image placement vertically and horizontally without having to physically move the projector.

## Comprehensive LAN Control Promises Effortless Management

LAN control enables IT staff to manage all projectors on campus via network, allowing full control and remote maintenance directly from a central workstation.

## DICOM X-ray Imaging Diversifies Teaching Methods

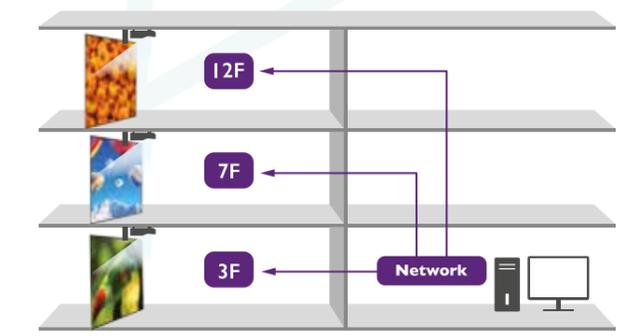

DICOM (Digital Imaging and Communication in Medicine) is a standard for handling, storing, printing and transmitting medical imaging information. The DICOM Simulation Mode is ideal for viewing grayscale medical images, such as X-rays, with an advanced grayscale level that's ideal for training and educational purposes.

\* Available on LU9235 / LX9215/LU950

## HDBaseT Compatibility

The groundbreaking HDBaseT connectivity combines video, audio, and device control signals from multiple sources including PCs, laptops, document cameras, Blu-rays, and DVDs onto a single CAT5 cable. This ensures seamless transmissions up to 100 meters for efficient installation in auditoriums, gyms, and large halls.

\* Available on LU9235/ LX9215/LU950

DICOM Simulation Mode

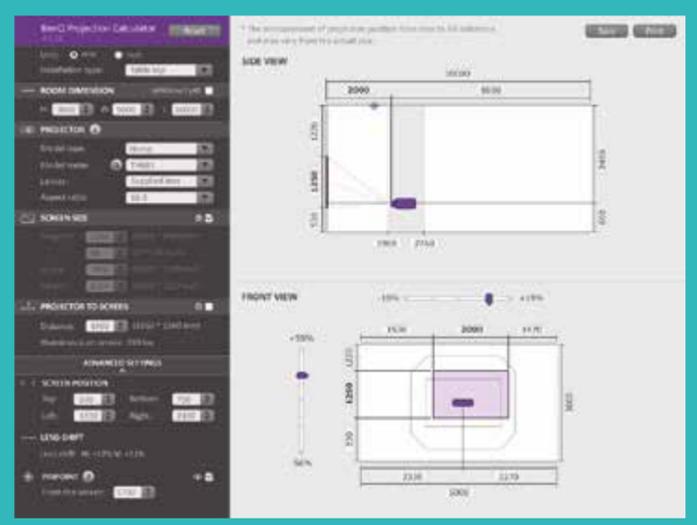

Presentation Mode

## BenQ Projection Calculator Ensures Installation Convenience and Projection Accuracy

The BenQ Projection Calculator is a free online tool that simplifies installation by helping installers to calculate projector positioning and receive information on recommended screen and projection size, throw distance, and projector placement depending on different applications.

Visit BenQ projection calculator <https://projectorcalculator.benq.com/>

## MEETING ROOMS

# Clear, Hassle-Free Wireless Projection

### Stunning Clarity and Ultra Quietness Create a Powerful Meeting Experience

Unlike noisy conventional high-brightness projectors, BenQ meeting room projectors produce up to 5,000 lumens of high brightness with minimal sound, even when they are fully powered on. Silent and brilliant, lessons will capture students' full attention without distraction.

### QCast Mirror Fulfills Instant Wireless Presentation with Effortless Setup

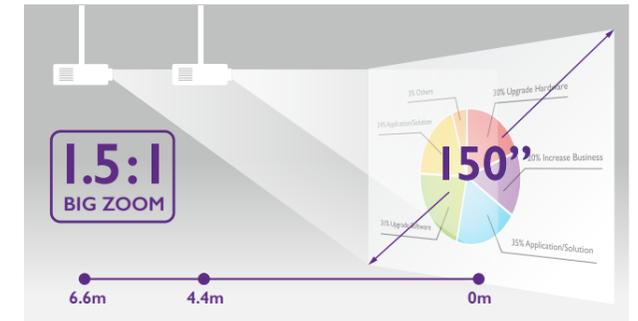

#### Screen Mirroring with Zero Software

By mirroring the screen, QCast Mirror HDMI Wireless Dongle lets meeting participants share universal file formats wirelessly from any iOS, Android, Windows, or Mac device. It facilitates the free exchange of ideas and collaborative teamwork for highly effective meetings without any downtime for configuration.

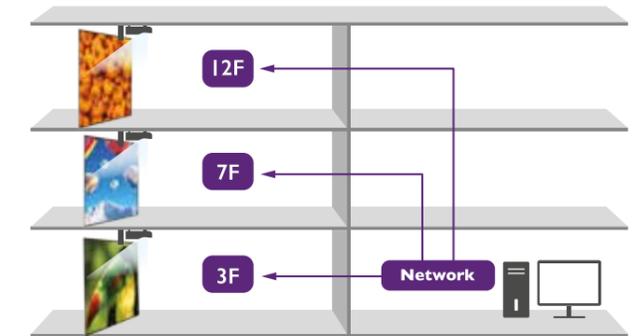

### Big Zoom Guarantees Ultra-High Installation Flexibility

Integrated big zoom capability maximizes image size in any available education space, enabling large-scale projection from a wide range of throw distances.

### LAN Control Capability Empowers Device Control and Management

BenQ meeting room projectors for education support leading LAN control systems including Crestron, AMX, and PJ-Link for simple integration into campus network infrastructures, with additional RS-232 control for reliable long-distance installations of up to 15 meters.

### Plug-and-Play Wireless Solution InstaShow™ Facilitates Wireless Presentation and Highly Interactive Group Discussion

#### Intuitive Streaming with No Software Setup

InstaShow™ offers a natural way for up to 16 participants to start presentations without wasting valuable class time for truly collaborative learning. A single-button solution, InstaShow™ can be plugged into the source laptop and takes mere seconds to start presenting wirelessly with zero software to install or configure.

#### Powerful Compatibility on Any Platform

Class content can be freely shared on any device with a standard HDMI input, utilizing instructional content from a wide range of devices such as laptops, Blu-Ray/DVD players, Apple TV, even PS4 or Xbox.

# Flexible Installation for Painless Upgrading

## Streamlined Wall Mount Alignment Ensures Precise Projection

An installation chart and ruler come with wall mounts for BenQ ultra short throw projectors, offering perfect screen alignment and image position in classrooms. Even simpler, a three-way adjustment knob is located in front of the projector mount for ideal and precise projection.

## Advanced Image Calibration Ensures Ideal Projection Alignment

### Digital Shrink

BenQ education projectors come with the digital shrink feature that can fine-tune screen sizes and perfectly align projection on the desired frame. It facilitates simple adjustment through OSD menu to significantly save setup time and avoid the need to physically adjust projector installation.

\*Available on LH890UST/ LW890UST/ LX890UST/ LW820ST/ LX820ST/ DX825ST/ DX808ST/ MW826ST/ MX825ST/ MW809ST/ MX808ST

### Corner Fit Correction

Even professional installations can be challenged by restricted or uneven spaces. Corner Fit provides flexible and convenient correction of picture dimensions via individual alignment of each corner.

\*Available on LH890UST/ LW890UST/ LX890UST/ MW864UST/ MX863UST/ MH856UST/ MW855UST/ MX854UST/ SX751/ SU754/ LX720/ LW720/ LH720/ SX765/ SU765/ SU922+/ LX770/ LH770/ LU950/ LU9235/ LX9215

# Effortless Management System Integration and Simple Maintenance

## High System Compatibility Fulfills System Integration and Effortless Maintenance

BenQ education projectors are compatible with Crestron, AMX, and PJ Link control systems for convenient system integration with various third-party devices, which helps to reduce maintenance cost via centralized management of multiple projectors.

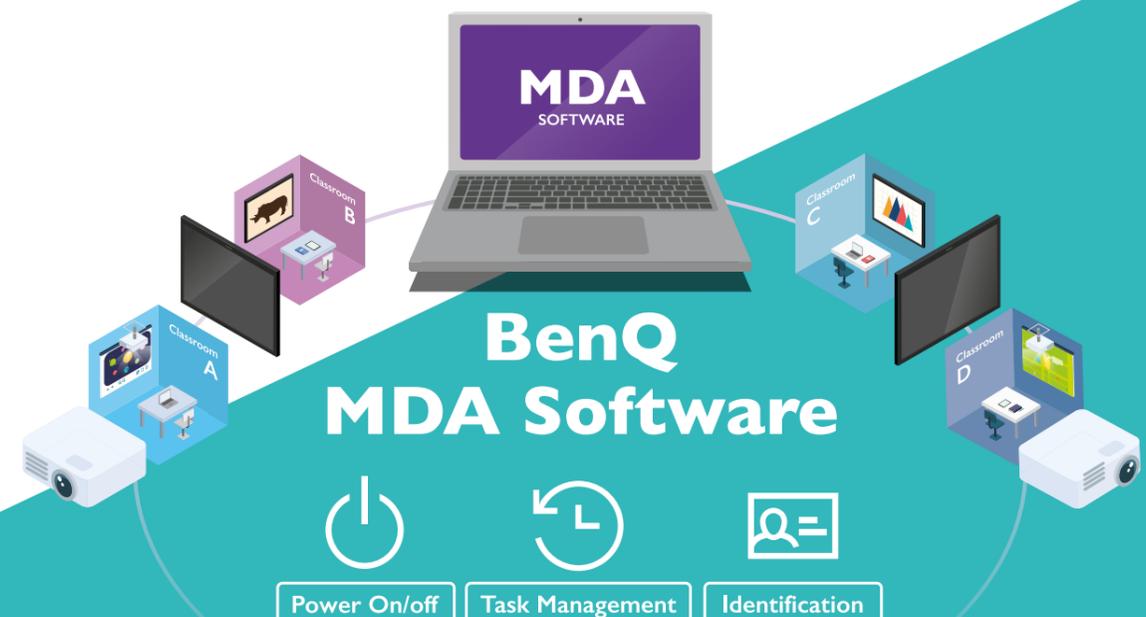

\*Extron compatibility: available on DX825ST/ MW826ST/ MX825ST. Developed by Extron, IP Link driver allows device monitoring, control, and support over LAN when MediaLink controller, IP Link Ethernet control interface, or other IP Link-enabled device is installed. For more information, please visit [www.extron.com/driverdownloads](http://www.extron.com/driverdownloads)

## BenQ's MDA Software Enables Centralized Multiple Display Management

Helping IT managers efficiently perform day-to-day maintenance, the BenQ Multiple Display Administrator (MDA) software dashboard enables powerful centralized monitoring, control, and power scheduling across a school's display network from a single computer, offering full access and control over every device directly.

Available on LX890UST / LW820ST / LX820ST / DX825ST / DX808ST / LX810STD / MW864UST / MX863UST / MW843UST / MX842UST / MW826ST / MX825ST / MW809ST / MX808ST / SX751 / SU754 / LX720 / LW720 / LH720 / SX765 / SU765 / SU922+ / LX770 / LH770 / LU950 / LU9235 / LX9215
