

We are proud to announce our **NEW** and **EXCLUSIVE**
Combination carrier for chamber slides and dishes!

Fits **any** Hermle microplate rotor or carrier!

Z326-02MP
Microplate rotor

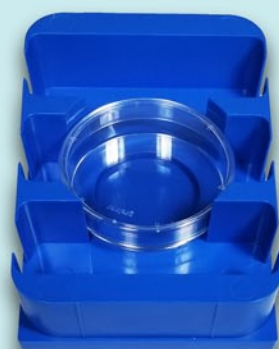

Z446-750-MP
Microplate carriers

3 x chamber slides

35mm dish

60mm dish

*Now available to add to your current Hermle listings!
Don't miss out on this revolutionary new product!*

The Z326-MPCA combination carrier is the **ONLY** accessory available for the centrifugation of chamber slides and dishes. Until now, centrifugation of these common vessels required researchers to invest in creating their own. This was time consuming, expensive, and in some cases unsafe. The revolutionary design of the Hermle Z326-MPCA is the solution, and is **EXCLUSIVE** to Hermle/Benchmark. The Z326-MPCA features three slots for chamber slides, as well as, two round positions to secure 35mm and 60mm dishes.

Centrifugation of chamber slides and dishes have multiple applications, including:

- Inducing contact of bacteria or viral particles with cells (usually for the purpose of infection and consequent imaging)
- Inducing contact between cultured cells and particles (nanoparticles, beads, non-soluble reagents)
- Treatment/washing of cells cultivated in suspension
- Also useful for certain experimental microscope slide techniques

A truly universal addition to our truly universal centrifuges. For more information visit www.hermleusa.com.

Ordering information

Z326-MPCA	3 x chamber slide and 35/60mm dish carrier 2/pk	\$189
-----------	---	-------

Compatible with the following items:

Z326-02MP	2 x 3 swing out microplate rotor
Z446-750-MP	Microplate carrier for Z446-750-AC rotor 2/pk
