

STATIC SOLUTIONS WITH SAVINGS

ESD SHIELDING BAGS

METAL-IN

- Metal-In
- Longer Lasting
- 40% Light Transmission
- Puncture Resistant
- Outer Layer Dissipative

Features: Botron's antistatic shielding bags are metal-in and low tribocharging. Thus, ESD sensitive materials stored inside the bag will not generate a charge. The 3mil thick lining is puncture resistant and protects against corrosive materials. Comes with either zipper or flat applications.

MOISTURE BARRIER BAGS

SEAL-IT

Features: Botron's Moisture Barrier Bags are a 3.6 mil multi-layer construction specially formulated to provide a safe and effective package for your ESD and moisture sensitive products. This highly flexible structure is easy to vacuum and seal. Meets all IPC/JEDEC J-STD-033 standards and specification 6 mill also available .

PINK POLYETHYLENE
ANTI-STATIC

Features: Botron's antistatic polyethylene bags do not generate triboelectric charges under normal working conditions. They should be used to package non-static sensitive components in the work environment that may generate or carry static charge.

ESD SHIELDING BAGS

METAL-OUT

Features: Botron's antistatic shielding bags are metal-out and low tribocharging. Thus, ESD sensitive materials stored inside the bag will not generate a charge. The 3mil thick lining is puncture resistant and protects against corrosive materials. Comes with either zipper or flat applications. Provides rapid charge dissipation and 30% light transmission.
