

# ProColor 490 Touch Table | Quick Start Guide

## ASSEMBLY

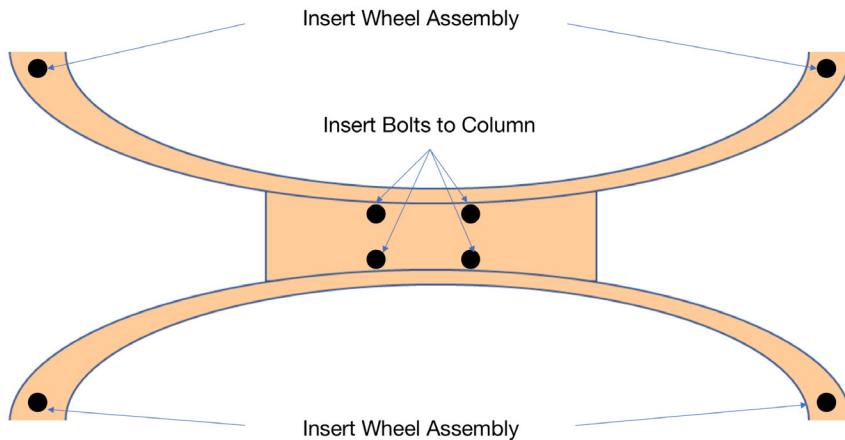

Assembly process:

1. Turn base upside down and insert the four wheel assemblies into the four holes on the underside.
2. Turn the base on its side and attach the column to the base using the four bolts and four washers.
3. Stand the base upright and attach the display to the mounting plate using the four bolts and four washers.

*NOTE: It is strongly recommended to have two people hold the display safely in place while a third works from below to insert the bolts.*
