

STORE & CHARGE CORE™ 36M CART

Optimized for various Chromebooks while designed with a small footprint to support an agile learning environment.

CORE36MS-CTTZ

FEATURES

- Designed for 36 Chromebooks and versatile enough to support most tablets, laptops/hybrids and Ultrabooks.
- Three rows of 12 vertical polypropylene shelf dividers store and protect devices from scratching.
- Digital timer distributes rotating power to groups of electrical strips every three minutes, allowing for efficient charging on one 15 Amp wall circuit.
- Hooks located in the front and storage bins in the rear for ease of cable management and organization of cords.
- Hinged doors located on both front and rear of cart allow for easy access to devices and charging components.
- A back panel version is available for those requiring less frequent access to the rear of the cart.
- Easy rolling 5" casters with four swivel and locking.
- Torque resistant lock acts as a handle when supplied combination padlock is removed. When padlock is inserted the cam is disabled which disengages lever and deters access to devices.
- Timer enclosure on side panel includes an on/off switch and doubles as a cord winder to keep the power cord out of the way when not in use.
- Ships fully assembled and ready for use.
- Constructed using an average 30% post-consumer recycled steel content and finished in environmentally friendly powder paint. Steel components are 100% recyclable at the end of the product life cycle. The Core™ 36M has achieved GREENGUARD GOLD Certification and is UL 60950-1 Certified for Safety of Technology Equipment. For additional information on UL 60950-1 and GREENGUARD GOLD Certification, visit bretford.com/certifications.

DETAILS

Torque resistant lock acts as a handle when supplied combination padlock is removed. When padlock is inserted the cam is disabled which disengages lever and deters access to devices.

Removable back panel version offers access to the rear of the cart for cable management (CORE36MSBP).

Polypropylene dividers store devices vertically and offer optimal spacing for device compatibility.

Front of the cart offers notched cable management hooks to position cords neatly above devices. Uses device manufacturer supplied AC power cord.
