## PROFESSIONAL CIRCULAR SAW BLADES

Designed to outlast and outperform.

Crescent's full range of professional circular saw blades are designed to outlast and outperform. Premium laser cut blades feature precision blend teeth, optimized tooth geometry and Active Shield™ protective blade coating that deliver increased performance for the toughest applications on the job.

### 8X Blade Life

High impact premium carbide teeth

### Laser Cut Vibration Slots

For minimal blade vibration and straighter cuts

### Laser Cut Expansion Slots

Reduces blade warping

### Active Shield™ Protective Blade Coating

Protects against gumming and corrosion with 70% more cuts per charge

CSBFR-724

## FRAMING CIRCULAR SAW BLADES

- High impact premium carbide teeth provide 8x blade life
- Active Shield™ protective blade coating allows 70% more cuts per charge
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Laser cut expansion slots reduces blade warping
- Laser cut vibration slots minimize blade vibration for straighter cuts

Cat. No.	Size	Arbor/Bore Size	Tooth Type	Hook/Rake Angle	Kerf Thickness	Product Weight

## RIPPING CIRCULAR SAW BLADES

- Micro grain premium carbide teeth deliver 10X blade life
- Thin kerf design for fast, precise cuts
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Laser cut expansion slots reduce blade warping
- Laser cut vibration slots absorb vibration for quieter cuts

Cat. No.	Size	Arbor/Bore Size	Tooth Type	Hook/Rake Angle	Kerf Thickness	Product Weight
CSBRP-1024	10 in	5/8 in	Alternate Top Bevel (ATB)	15°	0.098 in	1.850 lb

## GENERAL PURPOSE CIRCULAR SAW BLADES

- Micro grain premium carbide teeth provide 10x blade life
- Thin kerf design for fast, precise cuts
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Laser cut expansion slots reduce blade warping
- Laser cut vibration slots absorb vibration for quieter cuts

Cat. No.	Size	Arbor/Bore Size	Tooth Type	Hook/Rake Angle	Kerf Thickness	Product Weight

CSBGN-1244	12 in	1 in	Alternate Top Bevel (ATB)	15°	0.098 in	2.600 lb

## COMBINATION CIRCULAR SAW BLADES

- Micro grain premium carbide teeth deliver 10x blade life
- Thin kerf design for fast, precise cuts
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Optimized tooth geometry for reduced splintering and tear out
- Laser cut vibration slots absorb vibration for quieter cuts

Cat. No.	Size	Arbor/Bore Size	Tooth Type	Hook/Rake Angle	Kerf Thickness	Product Weight
<b>CSBCM-1050</b>	10 in	5/8 in	Alternate Top Bevel (ATB)	15°	0.094 in	1.690 lb

## FINECUT™ FINISHING CIRCULAR SAW BLADES

- Extended life and durability for 10x blade life
- Precision premium carbide teeth provide a 40% smoother surface finish
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Ultra-thin kerf design for precise cuts
- Optimized tooth geometry for reduced splintering and tear out
- Laser cut expansion slots reduce burning of finishes
- Laser cut vibration slots absorb vibration for quieter cuts

Tough gets the job done.  
Smart gets the job done right.

## STEELSLICER™ METAL CIRCULAR SAW BLADES

- Heat defense premium cermet teeth deliver 20X blade life
- Optimized tooth geometry provides 40% cooler cuts
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Laser cut vibration slots absorb vibration for accurate, clean cuts

Cat. No.	Size	Arbor/Bore Size	Tooth Type	Hook/Rake Angle	Kerf Thickness	Product Weight

## COMPOSITE DECKING CIRCULAR SAW BLADES

- Razor tipped premium carbide teeth provide a 50% smoother finish
- Optimized tooth geometry for clean, melt-free cuts
- Cordless and corded performance for maximum versatility
- Active Shield™ blade coating protects against heat for reduced gumming
- Thin kerf design for fast, precise cuts
- Laser cut expansion slots reduce burn marks
- Laser cut vibration slots minimize blade vibration to reduce swirl marks

CSBFC-1208	12 in	1 in	Flat Top	10°	0.094 in	2.665 lb

## HIGH SPEED AUGER DRILL BITS

- 5x more durable in nail-embedded wood
- Triple sharpened high speed steel is designed to cut through 20x faster than a standard flat paddle bit
- Optimal tip and tri-flute design offers more cuts per charge
- Optimized for heavy-duty use with modified impact zone provides 8x blade life
- High speed steel is 2.5x lighter than solid augers
- 1/4" quick-release hex shank provides optimal performance in both impact drivers and drills

Cat. No.	Bit Diameter	Bit Type	Shank Diameter	Shank Shape	Overall Length

# DRILL THROUGH HIGH SPEED AUGER BIT

## Smart Design Leads to Effortless Drilling

Crescent's High Speed Auger Bit provides ultimate performance and superior durability in nail-embedded wood applications. A three-step cutting action creates holes that are precise and clean. The self-feeding tip pulls the bit while the triple cutting edge delivers an effortless, smooth drilling experience in wood with nails. Deep flutes enhance the chip evacuation process for more holes per charge. The quick-change shank increases stability and durability in cordless and corded impact wrenches and drill drivers.

### High Impact Performance

Optimized for heavy duty use and 8x the life span with modified impact zone

### Tri-Flute Design

Tri-Flute Cutting Edges allow for faster chip removal and more cuts per charge

### Maximum Durability

NailRipper™

CDSA-645

### 1/4" Quick Release Hex Shank

Impact rated optimal performance impact drivers and drills

### Maximum Performance

Designed to cut through 20x faster than competitive standard flat paddle bits

## SHIP AUGER DRILL BITS

- Optimal flute design rapidly engages and penetrates materials
- Enhanced deeper flute design for ease of chip removal and less binding
- Refined cutting edges offer single cutting action for precise, clean holes
- Optimal tip design for rapid engagement in materials
- Longer length flute design to easily penetrate stacked wood and other thicker wood materials

Cat. No.	Bit Diameter	Bit Type	Shank Diameter	Shank Shape	Overall Length	Product Weight

## SOLID AUGER DRILL BITS

- Optimal cutting edges provide precise, clean holes in wood drilling applications
- Tip and flute design offers 40% more cuts per charge
- Triple sharpened high speed steel for cutting precise, clean holes in less time
- Deep flutes for fast chip evacuation and holes per charge
- 1/4" quick-release hex shank provides optimal performance in both impact drivers and drills

## INSTALLER DRILL BITS

- Extended length provides increased accessibility
- Small hole in flute for easily pulling wires and cables through walls, ceilings, and floors
- Refined tip allows for precision holes in clean wood
- Standard shank for optimal use in drill chucks
- Optimal flute design for aggressive chip remove

Cat. No.	Bit Diameter	Bit Type	Shank Diameter	Shank Shape	Overall Length	Product Weight
<b>CDIN-1813</b>	1/4 in	Installer	1/4 in	Hex	20.669 in	0.208 lb

## FLAT SPADE DRILL BITS

- Reinforced tip geometry increases durability and provides a longer life
- Advanced cutting grooves for fast and easy chip removal
- Reinforced shank with torsion zone for work at rapid speeds and aggressive cuts
- 1/4" quick-release hex shank provides optimal performance in both impact drivers and drills
- Drills more holes in less time

## SELF-FEED DRILL BITS

- Long lasting blades that can be resharpened for optimal cutting
- Optimal screw point tip quickly engages in materials
- Center feed screw point guides the bit to allow for faster and more precise pull through
- 7/16" quick release hex shank reduces slippage
- Three hardened cutting surfaces deliver long life, minimal binding, and fast chip ejection
- Includes replacement tip and hex key

## DRILL BIT EXTENSIONS

- Provides increased accessibility in fastening and drilling applications
- Quick release allows for effortless switching between accessories and sizes
- One piece construction for best concentration of force to provide a longer lifetime
- Effortlessly switch between fastening and drilling accessories
- Hex shank provides optimal performance in both impact drivers and drills

# THE BOLT BITER **IMPACT NUT EXTRACTOR AND DRIVER**

## Nothing Escapes A Bolt Biter's Grip

The new Crescent Bolt Biter™ impact nut extractor & driver is the ultimate tool for driving and extracting hex head fasteners of any condition, whether new, worn, rounded, rusted, or damaged. The revolutionary tapered socket design engages with the fastener on the first try and eliminates the frustration of working with old or damaged fasteners.

### 1/4" Hex Shank

Compatible with impact drivers and drills

CAVBXM1D16

### Impact Torsion Zone

Torsion design delivers maximum performance for impact applications

### Integrated Magnet

Allows fasteners to stay in place securely when extracting or driving

### Drives & Removes New and Damaged Fasteners

Bi-directional design enables easy drive, removal and reuse of new and damaged fasteners

### 5X Gripping Force

Tapered entry allows socket to easily seat on fasteners of any conditions

## BOLT BITER™ IMPACT NUTDRIVERS AND EXTRACTORS

- Bi-directional design for removing or tightening damaged fasteners
- Tapered entry grabs onto damaged fasteners with ease
- Up to 50x longer life in high torque impact applications
- 1/4" hex shank is compatible with impact drivers and drills
- Strong magnet for holding fasteners securely in place
- High-visibility laser etched markings provide quick size identification
- Black oxide finish to resist corrosion

## VORTEX™ BIT HOLDER

- Dual impact torsion zone absorbs shock, prevents stripped screws, and extends bit life
- Withstands heavy use in impact applications and prevents over-torquing fasteners
- Compatible with 1/4" hex shank impact drivers and drills
- Optimized tip geometry eliminates cam-out and promotes fastener retention
- Torsion zone delivers maximum performance for impact applications
- Unique steel formulation offers maximum strength
- Laser markings for long-lasting quick and easy size identification

## INSERT BITS

- Full body design for greater strength and durability
- Optimized tip geometry eliminates cam-out and promotes fastener retention
- S2 steel formulation offers maximum strength
- Unique heat treat process maximizes bit life
- Laser markings for long-lasting quick and easy size identification

## VORTEX™ IMPACT SOCKET ADAPTERS

- Ball detent for secure socket retention and easy replacement
- Torsion zone delivers maximum performance for impact applications
- Unique steel formulation offers maximum strength
- Heat treat process maximizes bit life
- Black oxide finish to resist corrosion

### 3" DRIVE GUIDE

- Magnetic tip keeps fasteners securely in place
- Quick-release for easy release of screwdriver bits
- Modified S2 Steel to maximize bit life
- Proprietary heat treat process extending bit life
- Impact rated

Cat. No.	Size	Overall Length	Quantity Per Package	Product Weight
<b>CABD3-1</b>	1/4 in	3.0 in	1	0.040 lb
<b>CABD3-25</b>	1/4 in	3.0 in	25	0.090 lb

## 2" QUICK RELEASE BIT HOLDER

- Magnetic tip keeps fasteners securely in place
- Quick-release for easy release of screwdriver bits
- Modified S2 Steel to maximize bit life
- Proprietary heat treat process extending bit life
- Impact rated

Cat. No.	Size	Overall Length	Product Weight
CABQ2D-1	1/4 in	2.0 in	0.100 lb

## u-GUARD™ COVERED BIT HOLDER

- Non-marring cover protects from scratching or damages
- Protective sleeve provides enhanced control and safety while fastening
- Full body bit design for greater strength and durability
- S2 steel formulation offers maximum strength
- Unique heat treat process maximizes bit life

Cat. No.	Size	Overall Length	Quantity Per Package	Product Weight
CAUGBH3-25	1/4 in	3.0 in	25	0.088 lb

## u-GUARD™ COVERED MAGNETIC NUTSETTERS

- Integrated magnet helps prevent nuts from falling out
