Built to Keep Your Workflow Flowing

No matter the service or products your organization provides, your team can run into challenging barcodes to read, and sometimes even environmental conditions can contribute to a scan failure. Wouldn't it be nice if everything worked the first time, every time? When your scanning solution works reliably and quickly, you save the time of repositioning to scan again, and more importantly, your team has the peace of mind of trusting your scanning tools.

The CR1500 reads any size or type of barcode, on any surface and in any condition, with ease. Whether it is a straight-forward scan, a code on a reflective surface in a dark room, or even a scalpel in the OR, Code's patented dual-field optics, lightning-fast proprietary processing, and Near-Zero-Miss decoder work as hard as you do.

The CR1500 withstands even the harshest disinfectants with CodeShield Level 3 Plastics. With healthcare and other industries becoming even more concerned about pathogen control, the CR1500 offers a solution for keeping your scanning solution germ free. Market-leading plastics, seamless body design, and best-in-class IP54 sealing make cleaning with your chosen disinfectant a breeze.

The CR1500 scans all standard barcodes out of the box, and optional parsing and validation make integration into any system painless. Plus, with Code's exclusive ScanFlex JS (JavaScript) programming, meeting even your most complex data editing requirements becomes simple. Compact, lightweight, and ergonomic, the CR1500 is one of the smallest barcode readers on the market.

The CR1500 truly is the scanner of choice for any critical application.

Typical Working Ranges

Test Barcode	Min mm (inches)	Max mm (inches)
3 mil Code 39	3.3" (85 mm)	4.2" (107 mm)
7.5 mil Code 39	0.7" (18 mm)	6.6" (167 mm)
10.5 mil GS1 Databar	0.2" (5 mm)	8.1" (205 mm)
13 mil UPC	0.5" (13 mm)	10.4" (265 mm)
5 mil DM	1.1" (28 mm)	3.9" (100 mm)
6.3 mil DM	0.7" (18 mm)	5.3" (135 mm)
10 mil DM	0.2" (5 mm)	6.5" (165 mm)
20.8 mil DM	0.5" (13 mm)	12.9" (328 mm)

Note: Working ranges are a combination of both the wide and high density fields. All samples were high quality barcodes and were read along a physical center line at a 10° angle. Measured from the front of the read with default settings in metric units then converted to imperial units. Testing conditions may impact working ranges.
