BRING CONTENT TO LIFE WITH CANON'S AWARD-WINNING LINE OF PROJECTORS

Canon REALiS, LX and LV-Series projectors are engineered to meet the exacting requirements of professionals who accept nothing but the best. Models are available in a variety of sizes, display technologies, resolutions, throw ratios and light sources, but at the core all share advanced optical and image processing technologies that help deliver outstanding image quality and performance. From the incredible, close-to-life 4K resolution of the 4K600STZ to the long-lasting laser projection of the WUX7000Z, Canon projectors can deliver exceptional brightness for a stunning image that will leave virtually every audience captivated.

PROFESSIONAL PROJECTION THAT GOES ABOVE AND BEYOND

From a corporate boardroom meeting to a medical training lecture, an eye-catching museum display to a highly realistic flight simulator, Canon offers a range of projectors with professional results that can meet the demands of virtually any application. Industries including higher education, design and engineering, museums and galleries and many more can depend on Canon projectors to bring their content to life and truly engage audiences, customers and students alike in spaces both large and small.

Simulation and Training

Creating an immersive, real-life experience is crucial in simulation training. Features such as Marginal Focus keep images projected onto curved surfaces true, while Built-in Edge Blending ensures seamless detail when combining more than one image in an immersive simulation.

Higher Education

From classrooms to lecture halls, the Canon projector line-up has options to meet educator needs with reliable, durable performance. Brightness will be strong in virtually any lighting situation for all to see clearly and engage in positive, meaningful learning.

Medical Education and Training

Medical students and teaching hospitals can view medical images such as X-rays using the DICOM® Simulation Mode* for subtle variance and gradation that increases clarity. Surgical procedure video and more can be shown in outstanding detail with high resolution and brightness for effective learning.

Museums & Galleries

Canon projectors can help museums bring out the intricate details of fine art and create captivating displays that will stop audiences in their tracks. Stimulate minds and imaginations with faithful color, film-like smoothness and beautifully bright images, however big or small the space.

Design and Engineering

Technical designs and complex engineering need absolute clarity and accurate reproduction to ensure everyone understands the scope and requirements of a project. Canon projectors are powerful enough to bring out even the smallest details and give audiences the clarity and sharpness they demand.

* Canon projectors with a DICOM® Simulation Mode have not been cleared or approved for medical diagnosis and should not be used for these purposes.

FOCUSED ON PROFESSIONALS

Whether you are a business of one, an organization of many or somewhere in between, working professionals need service and support they can count on. Canon provides skilled technicians to support our entire line of professional projectors. This small group of dedicated professionals has years of experience assisting customers with every aspect of their A/V needs. From the simplest of setups, to the most complex configurations, we are here to answer your questions.

CUSTOMER SERVICE & TECHNICAL SUPPORT

- Dedicated Team of Industry Experts
- Industry-leading Response Times
- 100% U.S.-based Call Center

PRODUCT REPAIR & MAINTENANCE

- State-of-the-Art Service Facilities
- Fast Repair Processing & Available Loaner Equipment
- Genuine Canon Parts
- Factory-level Quality

WARRANTIES

Canon Laser Projector Limited Warranty

Select Laser based Projectors offer peace of mind as they are backed by Canon USA's Laser Projector Limited Warranty, which guarantees that the projector will be free from defects in workmanship and materials for 5 years*1 from the date of original purchase or 12,000 hours of use.

Canon Projector and Lamp Limited Warranty

All Canon Lamp based Projectors offer peace of mind as they are backed by Canon USA's Projector and Lamp Limited Warranty, which guarantees that the projector will be free from defects in workmanship and materials for 3 years from the date of original purchase, and the Lamp for 120 days from the date of original purchase.

SERVICE PROGRAMS & PLANS

Advanced Warranty Exchange Service Program (3-Years)

The Canon Advanced Warranty Exchange Service Program*2 offers enhanced warranty service, providing a replacement unit in exchange for your eligible inoperative Canon Projector if repair service is required during the product's limited warranty period.

Service Loaner Program (3-Years)

The Canon Service Loaner Program*2 provides a loaner product in the event that your eligible Canon Projector is in need of repair during the limited warranty period. The loaner projector may be used while your inoperative unit is being serviced via Canon's "mail-in" repair service.

CarePAK Pro Av Extended Service Plan (optional)

The Canon CarePAK PRO AV Extended Service Plan*2 offers options for one year or two years additional coverage for up to five full years of service and support from the date the Projector is purchased (only available on select models).

*1 3 years for LX-MU800Z. *2 Programs and service offerings subject to change without notice. For complete details, including terms and conditions for each program, or to learn more about Service and Support offerings for Canon professional projectors, please contact a Canon sales rep or call 1-800-OK-CANON.

LV-X420

XGA 1024 X 768	4200 Lumens
DLP TECHNOLOGY	1.83 – 2.75:1 ^{*5} Throw Ratio

- DLP[®] Technology with BrilliantColor™ System
- Native XGA Resolution (1024 x 768)
- 4200 Lumens with up to 10,000:1 Contrast Ratio^{*13}
- 1.5x Optical Zoom Lens
- Flexible Connectivity including Dual HDMI with MHL^{*11, 12} Support

^{*9} This is an estimated value, actual hours may vary depending on usage and environment. This is not a guarantee of the life span of individual laser diodes. ^{*10} These models include a DICOM[®] Simulation Mode. These models have not been cleared or approved for medical diagnosis and should not be used for these purposes. ^{*11} Only one HDMI port is equipped with MHL. ^{*12} To utilize the MHL interface, a MHL cable is needed. Certain functions may not perform depending on the type of MHL connection. Wireless remote does not operate while using the projector with an MHL device. ^{*13} Full white, full black, lamp level changes by following a brightness characteristic of an image.

^{*1} Interchangeable lens models do not include lens. When ordering use referenced item codes. ^{*2} Calculated value for 100-inch image. ^{*3} Calculated value for 80-inch image. ^{*4} These models include a DICOM[®] Simulation Mode (available only in D models if there is a D model available). They have not been cleared or approved for medical diagnosis and should not be used for these purposes. ^{*5} There are three light modes: Normal, Quiet 1 and Quiet 2. The luminance values for modes other than Normal are calculated and are not guaranteed as specifications. ^{*6} When in Presentation Mode. ^{*7} When standard RS-SL01ST projection lens used. ^{*8} All white: all black. ^{*9} When the iris function is set to "Close 9."

^{*10} This is an estimated value, actual hours may vary depending on usage and environment. This is not a guarantee of the life span of individual laser diodes. ^{*11} There are three light modes: Full Power, Power Saver 1 and Power Saver 2. The luminance values for modes other than Full Power are calculated and are not guaranteed as specifications. ^{*12} When Lamp Control is "ON". ^{*13} There are two light modes: Full Power and Power Saver. ^{*14} Lamp control function is on. Calculated with "RS-IL01ST" (lens sold separately).

Weight		57.3 lbs. (26.0kg)		39.6 lbs. (18.0kg)	13.9 lbs. (6.3kg)	13.0 lbs. (5.9kg)	13.9 lbs. (6.3kg)	61.7 lbs. (28.0kg)	45.2 lbs. (20.5kg)	19.6 lbs. (8.9kg)	11.9 lbs. (5.4kg)		7.5 lbs. (3.4kg)		

^{*1} Interchangeable lens models do not include lens. When ordering use referenced item codes. ^{*2} Calculated value for 100-inch image. ^{*3} Calculated value for 80-inch image. ^{*4} These models include a DICOM[®] Simulation Mode (available only in D models if there is a D model available). They have not been cleared or approved for medical diagnosis and should not be used for these purposes. ^{*5} There are three light modes: Normal, Quiet 1 and Quiet 2. The luminance values for modes other than Normal are calculated and are not guaranteed as specifications. ^{*6} When in Presentation Mode. ^{*7} When using Dynamic Contrast function. ^{*8} When the iris function is set to "Close 3." ^{*9} This is an estimated value, actual hours may vary depending on usage and environment. This is not a guarantee of the life span of individual laser diodes. ^{*10} There are two light modes: Full Power and Power Saver. ^{*11} Lamp control function is on.

^{*12} Indicates projectable range, although the optical performance is guaranteed from 50–200 inches. ^{*13} Dual Lamp / Single Lamp Mode. ^{*14} Dynamic Black Off/On. ^{*15} Lamp mode is Normal/Eco. Brightness in Eco mode is only a calculated value, and is not guaranteed as specification. ^{*16} Maximum Power Consumption. ^{*17} Full white, full black, Image mode set to presentation. Light source turns off when full black is projected. Dynamic contrast ratio. ^{*18} Only one HDMI port is equipped with MHL. ^{*19} For protection of product, light emission from light source may be decreased when external temperature rises. ^{*20} Full white, full black, lamp level changes by following a brightness characteristic of an image. ^{*21} To utilize the MHL interface, a MHL cable is needed. Certain functions may not perform depending on the type of MHL connection. Operation from the remote controller is not possible when connecting an HDMI cable with a MHL adapter. ^{*22} This time guarantees a 50% survival rate and a 50% brightness-maintenance rate. This value does not guarantee the operating life of lamp.
