

SUPPORT YOUR CISCO WEBEX®

The Cisco Webex Boards provide a range of features to enhance meetings. Be sure you can take full advantage of those features with proper placement from Chief.

The 55" and 70" Cisco Webex Boards require a specific adapter to accommodate the weight and unique mounting patterns. Chief's special bracket kits provide a 600 x 400 VESA® or a 14" button pattern that allows mounting of Cisco Webex Boards to Fusion and Q-latch mounts. Potential applications with the brackets include carts, stands, fixed wall and swing arm wall mounts to meet the specific installation's requirements.
