### PAC-516 Site Preparation

#### Locate and Prepare Mounting Site

1. Identify a suitable wall location for the accessory.

**IMPORTANT ! :** The PAC516 is designed for in-wall installation between two wood or steel studs, 16" on center. Inadequate space will remain on each side between studs for electrical wires/cables, plumbing, ductwork, or insulation. Locate accordingly!

2. Using a stud sensor, locate and mark studs.
3. Center and level housing between marked studs.
4. Using housing as a template, draw pencil line completely around housing.

**NOTE:** Housing is designed to fit between and directly against two adjacent wall studs.

5. Using a measuring tool, measure the marked area and compare to the dimensions below. If measurements match, continue to Step 6. If not, adjust markings to match dimensions below. (See Figure 1)
