## G Series 0.75-0.95:1 zoom lens recommendation

When using the 0.75-0.95:1 zoom lens with the G Series projectors, the gap between the lens edge and the black lens ring is less than 1 mm. This does not leave much buffer room for performing lens shift operations.

Christie recommends removing the black lens ring when using the 0.75-0.95:1 zoom lens with the G Series projectors.

GS Series projectors do not need to have their lens ring removed when using the 0.75-0.95:1 zoom lens.

## Affected products

The following products are affected:

- DHD550-G
- DWU550-G
- DWX600-G
- DHD600-G
- DWU600-G
