## Securing an LCD display panel to an adjacent panel

This document provides instructions for installing the brackets that secure two panels to each other.

### Affected products

These instructions apply to the following products.

- FHD493-XE
- FHD553-XE and FHD553-XE-H
- FHD553-XE-R and FHD553-XE-H-R

## Securing an LCD display panel to an adjacent panel

Learn how to install brackets securing two LCD display panels together.

1. Ensure there is a minimum of 0.5mm, or the thickness of a credit card, between the two LCD display panels.  
Gaps smaller than 0.5mm may cause cracks in the glass.
2. Install two of the #2 Phillips screws through the bracket into one of the panels.
3. Install the other two screws through the bracket into the adjacent panel.
