Range of Connectivity

From the classroom to the boardroom, interactive technology has changed the face of presentations.

Technology has made it easier than ever to communicate clearly and collaborate with confidence. But how effective is an interactive display if you're shackled to the front of the room for the entire presentation? With the Clear Touch® Wireless Keyboard & Touchpad, you gain the freedom to move about and interact with your audience while still controlling every detail of your presentation. Change slides, type notes, zoom in, zoom out, and highlight important information— all from up to 30 feet away. Our new wireless solutions give you the flexibility to present information however and wherever you want.

The Clear Touch® Wireless Keyboard & Touchpad gives you the power of convenience by allowing you to control when your device can turn off. This device features a power saving, standby, and sleep mode.
