ABOUT CONEN MOUNTS

46

Since the introduction of interactive technologies about a decade ago, teaching methods have begun to change. A clear shift is noticeable from the traditional teacher-centered education towards a student-centered approach, in which group work is encouraged and students learn through interaction and collaboration. This changing approach requires more mobile and flexible teaching solutions.

ConenMounts mounting solutions give everyone the opportunity to participate. The height adjustable mounts allow for the board or display to be smoothly raised or lowered and provide teachers and students an optimum ergonomic and writing position.

WHY HEIGHT ADJUSTABLE?

One school – many teachers and children – different ages – various heights

Our system is height adjustable

ONE FOR ALL

Whether wall mounted or mobile, ConenMounts adjustable solutions allow for everyone to participate. With up to 28" of vertical height adjustment, even those in early grades or in wheelchair can access the board. For small group learning activities or for situations that require a portable solution, ConenMounts offers a variety of height adjustable mobile stands.

ConenMounts solutions are developed to help schools transition from traditional to interactive technologies.

Our mounts accommodate any interactive technology, whether interactive projector, interactive whiteboard or flat panel display and allow for future upgrades. This makes ConenMounts a long-term investment, allowing for budget to be freed-up and spent somewhere else.

If you are ready to take interactivity to a whole new level, complement your technology with a ConenMounts adjustable mount.

With over 40 years of experience in manufacturing height adjustable solutions, Conen has focused on its range of motorized mounts in the past couple of years. Motorized mounts offer several distinct advantages over spring operated or counterbalanced solutions:

Compatible with any interactive technology

ConenMounts motorized solutions allow for a max. 330 lbs. weight load. The systems work with any interactive technology, whether board and projector or heavy 84" display.

Counter weight or spring tension mechanisms come with a specific set of weights or springs to balance the weight of the system. Any change in weight load, for example by adding speakers, or if a projector is being exchanged, may cause for the system to not work properly.

With a ConenMounts motorized solution, weight load changes are not an issue. Up to a max. 330 lbs. weight load, our mounts will allow for anything to be added.

Maintenance free

Another benefit of a motorized solution is that the system does not require any maintenance.

Whereas a spring tensioned mechanism tends to lose its tension over time and requires for a system to be rebalanced, a motorized solution is maintenance free.

ADA compliant

The Americans with Disabilities Act (ADA) ensures access to the built environment. To prevent hazards to people with vision impairments, the safety standards limit the protrusion of objects into circulation paths.

These standards also address the accessibility and maneuvering clearance of elements, such as displays, so that all users can take a full advantage of all their features.

All Conen's mobile and wall mounted solutions comply with the requirements of the ADA Standards.

Future proof

The modular concept of ConenMounts solutions allows for easy upgrades to future technologies or requirements.

A wall mounted system can easily be converted into a mobile solution, simply by adding a mobile base.

And a motorized solution that is purchased now for use with board and projector can, sometime in the future, be easily converted into a system for use with Flat Panel Display.

All of this is possible because the heart of the system, the motorized center column, always remains the same.

Safe mounting to stud walls

ConenMounts wall mount solutions are the safest wall mount solutions currently available. Unlike traditional wall mounts where the entire weight load is being supported only by the wall, our center column systems absorb all the weight without any wall reinforcements.

Whether mounted to a solid, brick wall or to a wood stud wall, a Conen Mounts solution safely supports your technology.

Limited life time warranty

ConenMounts products comply with all important international products and safety standards, including UL and CSA.

As a commitment to the quality of its products, Conen backs the range of motorized mounts by a 5 year warranty.

MOTORIZED WALL MOUNT FOR FLAT PANEL UP TO 70"

Classroom technology should not be limited to just a few. With ConenMounts motorized wall mount the display can easily be raised and lowered to give teachers and students of any height the opportunity to participate.

Designed for use with 42" – 70" Flat Panel displays the SCETAWLBOX motorized wall mount features a sheet metal display mount with series of integrated VESA patterns.

The box style design of the mount allows for hardware, such as mini-PC or laptop, to be stored neatly behind the display. The unit offers 20" of smooth height adjustment, provided by the UL-approved actuator that is safely built into the center column. Every wall mount comes standard with 4 leveling feet, a wired remote and 2 wall mount brackets to secure the column to the wall.

MOTORIZED WALL MOUNT FOR FLAT PANEL UP TO 84"

The SCETAWL and SCETA3535 Wall Mounts are designed for Flat Panel Displays up to 84". The units feature a sturdy display mount with integrated cable management and 'pull and release' locking brackets for quick and easy mounting of the display.

The difference between the SCETAWL and SCETA3535 is in the center column; the SCETAWL comes with the standard column that offers 20" of vertical travel,

the SCETA3535 features the new 3-tier column with extended 28" of height adjustment, making it the perfect solution for K-6 or special needs applications.

It provides the best of both worlds; a minimum clearance for accessibility by small children or people in wheelchair and maximum clearance for the teacher to present.

DELUXE PROJECTION SCREEN AND MARKERBOARD

The ConenMounts 'DeLuxe' projection grade board screen is designed specifically for use with (interactive) projectors. The boards feature a low glare, hotspot-free surface, offering a wide viewing angle.

The surface is framed in a thin, clear anodized aluminum frame with mere 0.075" bezel thickness at the screen surface, guaranteeing compatibility with even the most

demanding interactive projector. The surface is magnetic and erasable, allowing for the board to be used both as a projection screen and as a whiteboard with dry erase markers and magnets.

The highly stable construction of honeycomb core and steel surface on both sides ensures perfect screen flatness.

ConenMounts is a brand of Conen Products, a leading manufacturer of educational furniture and visual presentation equipment headquartered in Germany. Part of its extensive portfolio is a range of board solutions.

Built on its 40 years of experience, ConenMounts solutions are designed around the educator and installer. They offer ease of installation and ease of use, provide flexibility and complement the technology they support. All products are designed to withstand intensive daily use and to offer perfect ergonomics.

ConenMounts continues to be an industry leader, designing state-of-the-art mount solutions.

This catalogue shows only a small part of the full product line. Few more examples of products manufactured by Conen are shown below. Feel free to reach out to us if you would like to receive more information on these products or if you have any other questions or requests.

Motorized mobile stand for 100" displays

Designed for use with flat panel displays over 100" in diagonal or over 330 lbs. The 'SCETA12X2' motorized mobile stand features two aluminum columns with integrated actuators, offering a 20" vertical travel.

Flat panel mounts with A/V cabinets

ConenMounts offers a full line of AV furniture, including motorized flat panel carts with locking cabinets. All these products are customizable.

Digital signage mounts

ConenMounts collection of digital signage mounting solutions includes back-to-back screen mounts and mounts with rotating mount that accommodate flat panels in landscape or portrait orientation.
