

ADJUSTABLE WALL MOUNT LIGHT

Classroom technology should not be limited to just a few. ConenMounts motorized Wall Mount Light provides 20" of height adjustment, providing teachers and students an optimum ergonomic and writing position and enabling even those in early grades or in wheelchair to participate.

The wall mount supports 55" – 75" flat panel displays and works by a simple, push-button operation. Because the weight

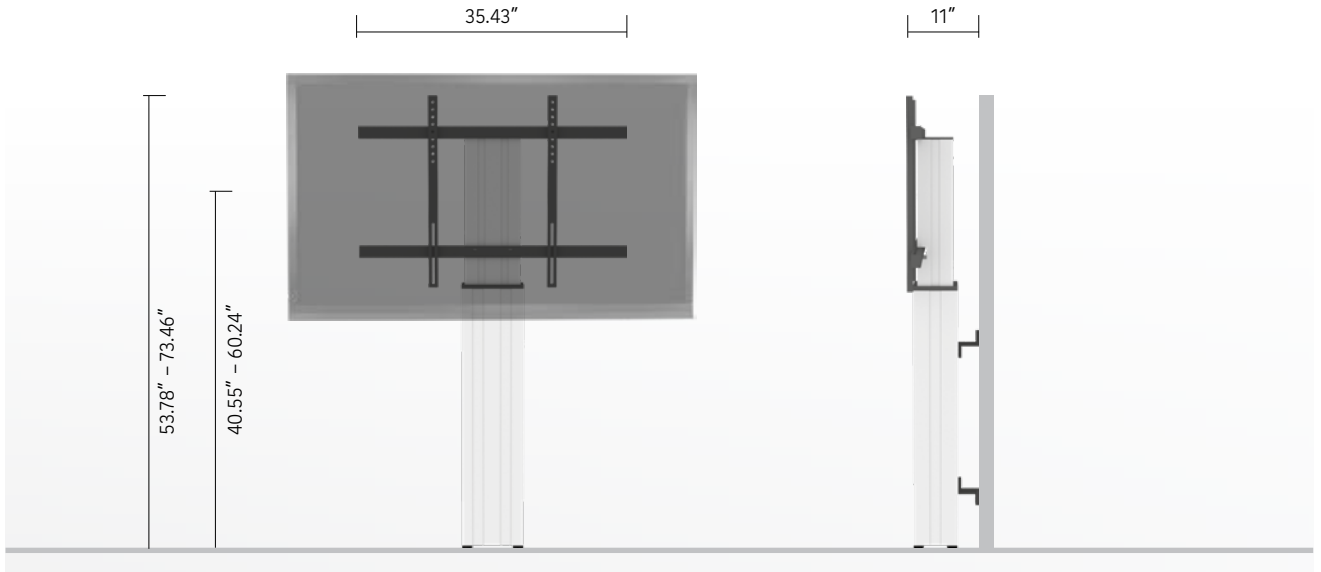

of the display is supported by the center column, the wall mount allows for the flat panel to be secured to any wall, including stud wall and over an existing dry erase board.

The maintenance-free system complies with the requirements of the ADA standards and is backed by a 5 year warranty.
