

CRESCENT

Adjustable Wrenches

In 1907 we created the first adjustable wrench. Now, we've revolutionized it without the frustrations.

CRESCENT

Fast Fittings. Frustration Free.

Over a century ago, we created the adjustable wrench, setting the industry standard. Today, we continue our legacy, revolutionizing the original with enhanced features for fast fittings that are frustration free.

Quick-Fit Adjustable Wrench

Quick-Fit-Jaw Design

Lead-ins and 1 degree slope on lower jaw allow for fast fitment on fasteners and fittings despite differences in dimension

Larger Knurl with Surround

For easier adjustment and tighter jaw fit; won't bind up. Surround helps prevent accidental back-off

Off-Corner Loading

Helps prevent rounding of fasteners when applying heavy torque

AC310CVS

Slim Head, Wide Jaw Design

Provides 20% more access and 20% more capacity

Cat. No.	Description	UPC	Overall Length	Capacity Diameter Max	Weight (lbs.)
