DATAMATION SYSTEMS, INC

K-12 device management made easy.
## Spend more time teaching and less time charging and securing devices.

Datamation's Univault and Gather'Round™ carts are trusted by hundreds of school districts across the U.S., including the nation's largest public school system, to:

Fully leverage their mobile technology investment

Store, charge, and protect large fleets of Chromebooks, laptops, tablets, iPads, iPhones

Help teachers manage their classrooms efficiently and spend more time teaching

Ensure every student has access to a charged and ready device

Save IT managers time, money, and labor

Common features of Univault and Gather'Round™ carts:

- Compact design to work in any classroom space
- Mobile, easy to move for flexibility of use
- Secure locking system
- Built-in cable management for organization, no cable chaos
- Accepts standard IEC plug types (two or three prongs)

- Solid USA-sourced steel construction, easy to wipe clean and sanitize
- Industrial-grade swivel and locking wheels, durable and quiet
- Conforms to ETL safety standards

"The carts help me maximize teaching time in the classroom and eliminate the surprise of uncharged devices."

–New York City High School Teacher

Datamation storage and charging solutions protect your technology investment for the long-term.

In the U.S., K-12 device shipments increased **by about 90 percent** year-over-year in 2020, representing the largest increase of any global region.

Spend on computing devices accounted for the **largest share of IT budgets in 2020.**
