

DESKTOP6PLUS

“Excellent product. It is just perfect for our needs. We are a small library and your product allows us to store and charge 6 Chromebooks in a very small space. It’s very colorful and works into the decor of our children’s area beautifully. I would highly recommend this product.”

Belmar Public Library -Patty Faugno

holds up to 14” devices

WHY SCHOOLS LOVE TOWERS BY POWERGISTICS

STUDENT MANAGED

Taking the teachers out of device deployment, allows for more time teaching and less time dealing with the hassles that we have become accustomed to with traditional carts.

SPEED OF DEPLOYMENT

By allowing students to manage their own devices, we have been able to cut down deployment time to almost nothing. Classes can start when the bell rings allowing the charging and storage of devices to be a non issue.

OPEN CONCEPT

With the open concept of the Desktop6PLUS, teachers and IT staff now have the ability to immediately see when the devices are missing or when the devices are not plugged in.

SECURITY

With the heavy duty rear Stainless steel door, and visual inventory the Desktop6PLUS has maximized security while still retaining an open concept to visually track classroom devices.

QUALITY

The Desktop6PLUS is built with military grade aluminum and can handle the roudiest of students. The full aluminum construction allows for a light weight charging station and a natural heat sync to keep devices from over heating during the charging process.

MADE IN THE USA

PowerGistics proudly engineers, manufactures and markets all of our products in the heart of Wisconsin. Domestic manufacturing allows PowerGistics to listen to our customers and make changes to enhance the educational experience, quickly.

PowerGISTICS

KEY FEATURES

WHAT ARE TOWERS BY POWERGISTICS?

1 EXTERNAL OUTLETS

Each desktop tower comes with a fully protected, securely mounted power strip in the back, but you won't have to worry about losing a power source to plug in. The desktop tower has been designed to include an extra outlet on the outside to provide you with an extra charging outlet for other technology needs.

2 DURABLE

The strong stainless steel door covers and protects the built in power supply and unsightly cords in the back of the desktop unit. All cords and adaptors are completely hidden, yet easily accessible by removing the snap fit door on the back.

3 CABLE MANAGEMENT EYELET

Utilize the eyelet to lock each cable. This allows enough charging cable for the students to plug in their devices, yet locks the cable in place to eliminate loss & damage.

4 OPEN DESIGN

Along with the same open concept and design as the PowerGistics Tower Series, your power-strip warnings and resets are all within reach!

5 NO MORE TANGLES

With the Cable Eyelet in the rear of the shelf, your cables will remain untangled and secure at the end of each shelf, eliminating warranty claims.

6 NUMBERED SHELVES

Allowing your students and staff to see their assigned device, keeping your classrooms, libraries and common areas neat and organized.

TECH SPECS

Model #:	PGD0614
Tower Dimensions:	17.75" H x 11" W 19" D
Shelf Size:	14.5" Deep x 10.5" Wide
Number of device slots:	6
Power Supply:	20V AC-50/60 Hz, 15 AMPS,
Cooling:	Slots for air movement around PowerStrip

Power Outlets:	6 internal outlets, 2 external outlets
Mobility:	Table Top
Shipping Weight:	15lbs
Product Warranty:	*Lifetime see website for more information
