AVerVision U10

AVer's USB powered flexarm document camera!

Easiest way to integrate your document camera image with your digital curriculum content and at $199 MSRP it's a budget friendly classroom addition.

What specifications set the U10 apart?

- USB powered with **Auto Focus** & **built-in LED lighting**

- **30fps video** for smooth motion with no delay

- Up to **720P output** adds unmatched image clarity

- **11" x 14" viewing area** captures all the important details

- **Built-in microphone** for video/audio recording

- Compatible with **Skype** and various conferencing software

- Customers are covered with a **2 Year Warranty** and **free two-way shipping** on warranty service items

What makes the U10 a great addition to any classroom?

With Auto Focus and seamless 30 frames per second HD video, your lessons will be brought to life!
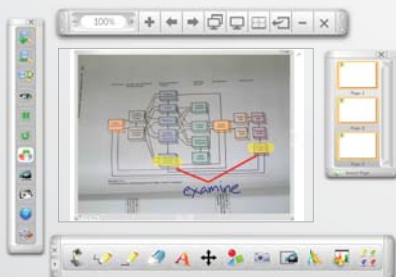

The **flexarm** design makes the U10 ideal for maneuvering around 3D objects and showing student presentations.

A full **11" X 14" viewing area** is perfect for capturing large books and objects. With **auto focus** and live video at **30 frames per second**, outputting in **HD** means your lessons will be brought to life!

Video/audio recording using the built-in microphone lets teachers record lessons directly into our exclusive A+ software. The U10 also works seamlessly with Skype™, Adobe® Connect™, WebEX as well as a host of other video conferencing software.

A+ is a lesson planning program that allows you to annotate on your doc cam image and also create fully interactive and engaging lessons that speak to today's digital natives.

The Importer plug-in gives users a way to integrate our award-winning document cameras with other third party programs, providing a universal document camera solution.

Why AVer?
