

Affordable, Simple, Reliable Measurement

The Bacharach Comfort Chek is a versatile handheld analyzer that is ideal for verifying indoor air comfort and quality.

Available in two models:

- Model 100 – measures CO₂, barometric pressure, temperature and humidity (features diffusion gas sampling)
- Model 200 – measures CO₂, barometric pressure, temperature, humidity and CO (features an internal pump for remote gas sampling)

Each reading is displayed separately, but by pressing the f3 button the user can easily scroll through all the readings. Peak readings can also be displayed by pressing and holding down the f3 button.

Both models feature data-logging, charge-and-run capability, and a user-zero function for all gases. There is enough memory to store up to 200 sets of data. Power is provided by a long-life NiMH battery, which is capable of providing up to 8 hours of continuous operation from one charge.

The Comfort Chek is small enough to fit in the palm of your hand, remarkably easy to use, and is ideal for trend analysis and record keeping.
