

Mobile Presentation Kit

Visual Presenter + Mobile Projector

*Making vivid presentations
Anywhere, Anytime!*

What is a visual presenter ?

A visual presenter is an image capture device that can be used for a product presentation, video conference or training. It allows you to demonstrate documents/ smart phones/ tablets or magnify small product parts, It can even be used as a web cam for online meetings.

**Visual Presenter is a trademark of ELMO Company limited*

MO-1 Mobile Visual Presenter

Mobile & Easy

Weighing only 550g, the easy-to-carry feature enables you to present anywhere, anytime. The MO-1 is surprisingly easy-to-use; just place your information under the camera, connect the MO-1 to a projector, and you're ready to create a vivid visual presentation!

High Quality

Reproduce objects in true color while showing details clearly. High definition and smooth video images can be fully displayed on the screen.

Online Conference

Web-cam function for network communication.

**With built-in microphone*

Built-in SD card reader

More Features

Powered via USB

Available in the 3 colours

Why ELMO Mobile Presentation Kit?

The ELMO Mobile Presentation Kit is the first to include a visual presenter and mobile projector. Now you can create impressive visual presentations combining real objects and computer slideshows. The whole solution is so portable and easy to set up which is ideal for onsite and small meeting room presentations .

BOXi Mobile Projector

Small Device, Big Screen

Weighing 500g, and only 132 x 132x 43mm, the ELMO BOXi is ideal for on-the-fly business presentations or training. The Short Throw Focus feature allows you to produce a big screen image in a limited space. 1m throw distance gives a 50-inch screen image!

View Document/ Image/ Video via USB Memory

All the contents saved on a USB Flash memory can easily be accessed through BOXi's Document Viewer. Present PowerPoint, Word, Excel, PDF and your videos/images (AVI, MOV, MP4 MPG, JPEG, BMP, etc) without connecting to a computer!

Quick, Long Life, WiFi

The BOXi takes only 7 seconds to start the projection saving you valuable preparation time for the presentation. The LED lamp life is estimated at 20,000 hours! What's more, with the iOS APP "BOXi Air", you can wireless project the data saved on your iPhone/ iPad.

Specifications
