

Instrument Security Procedures

Model:

1551A EX/1552A EX

Product Name:

Stik Thermometer

Instrument Description:

Precision thermometer

Memory Description:

The 1551A EX/1552A EX may optionally contain non-volatile memory used for logging temperature measurements.

Memory Cleaning Instructions:

If the instrument contains the optional non-volatile memory, the non-volatile memory can be easily cleared of all recorded measurements. Press the Setup button to access the Logging menu. Press Setup to advance through the menu to reach the Erase function. Press the Up button to select the erase option. Press the Enter button to confirm and proceed with the erase operation.
