

## Instrument Security Procedures

**Models:**

Fluke 280 Series

**Product Name:**

Waveform Generators

**Instrument Description:**

These universal waveform generators combine many generators in one instrument. Their extensive signal simulation capabilities include arbitrary waveforms, function generator, pulse/pulse train generator, sweep generator, trigger generator, tone generator, and amplitude modulation source.

**Memory Description:**

The 280 Series Waveform Generators contain non-volatile memory. The 640 KB BBRAM is user-modifiable and contains memory for system control, instrument setup, arbitrary waveform storage and setup. The 1 Kbit EEPROM is also user-modifiable and contains the instrument calibration constants.

**Memory Cleaning Instructions:****BBRAM**

Remove top cover. Remove battery link (CPU LK2). Wait 30 minutes. Replace link and cover.

**EEPROM**

None
