Instrument Security Procedures

Models:

Fluke- Hart Scientific Model 4180/4181

Product Name:

Precision Infrared Calibrators

Instrument Description:

Calibrators for infrared thermometers

Memory Description:

The instrument contains non-volatile memory that is used to store operational, control, and instrument calibration settings.

Memory Cleaning Instructions:

The Fluke-Hart Scientific Model 4180/4181 stores no measurement data in non-volatile memory. Once power is switched off, measurement data is non-recoverable.
