

Instrument Security Procedures

Model:

9040 / 9040UK

Product Name:

Fluke 9040 Phase Rotation Indicator

Instrument Description:

The Fluke 9040 effectively measures phase rotation in all areas where 3-phase supplies power motors, drives, and electrical systems. The Fluke 9040 is a rotary field indicator and can provide clear indication of the 3-phase via a LCD display and the phase rotation direction to determine correct connections. It allows rapid determination of phase sequence and has a voltage (up to 700 V) and frequency range suitable for commercial and industrial applications. The included test probes have a variable clamping range for safe contact including industrial sockets.

Memory Description:

No memory is included in these instruments.

Memory Cleaning Instructions:
