

Take readings
QUICKER.

Solve problems
FASTER.

Fluke **CNX** 3000 Series Wireless System

**FIND IT. FIX IT.
FAST.**

Meet the Fluke **CNX** 3000 Series Wireless Team.
YOUR TOOLS—CONNECTED.
TAKE READINGS QUICKER. SOLVE PROBLEMS FASTER.

Fluke CNX wireless test tools work together to help you solve problems faster. With the CNX team, measurements are:

- Remote
- Simultaneous
- Recordable

The new Fluke wireless troubleshooting team lets you see live measurements from multiple modules simultaneously and remotely on a single screen. This customizable tool set, built with the durability, reliability and quality you expect from Fluke tools, will change the way you work.

The wireless multimeter displays readings from up to 3 wireless modules, plus the meter. The laptop displays readings from up to 10 modules. Both from up to 20 meters away!

Wireless enabled modules measure AC voltage, temperature and AC current. Choose a standard true-rms clamp or flexible true-rms clamp to measure AC current. Mix and match modules to suit your unique measurement needs.

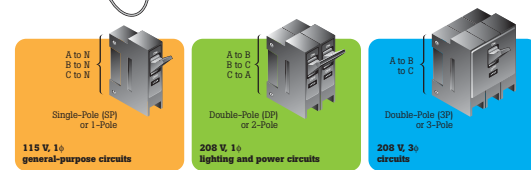

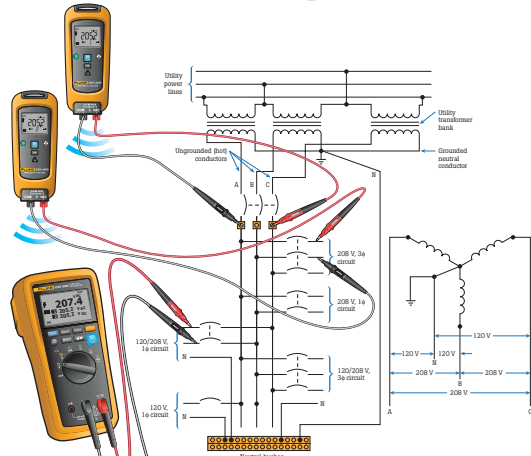

WIRELESS TOOLS

The team. Fluke CNX tools work together. Remotely. Simultaneously. Conveniently.

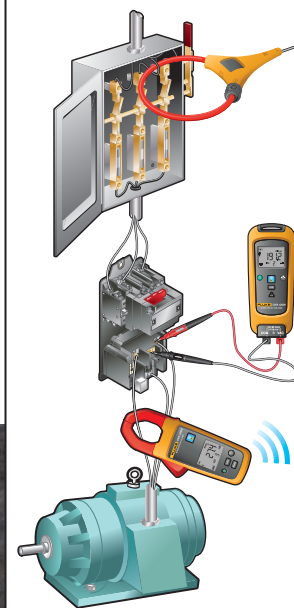

These illustrations demonstrate a few different ways the CNX system can be used. Visit our website or ask your distributor for more information and to see other CNX applications.

POSSIBLE APPLICATIONS

Detecting power interruption—measurement procedures

Single phase measurement

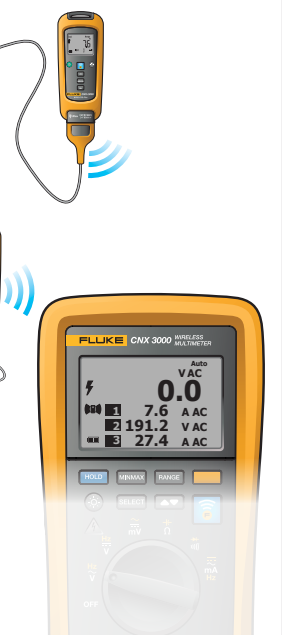

WIRELESS MULTIMETER

The captain. Get multiple readings in real time, at the same time, on one screen. From 20 meters away.

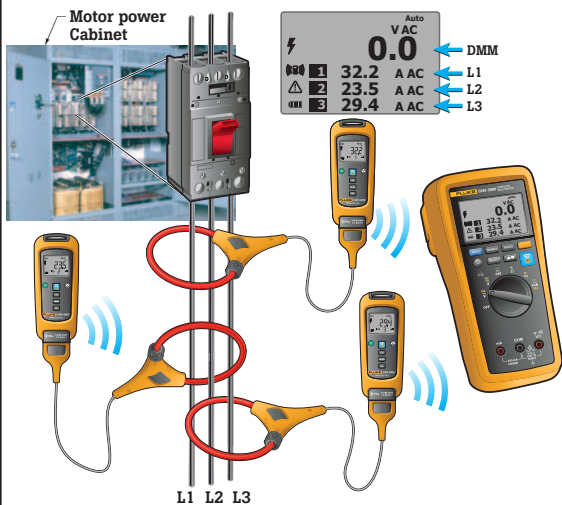

SOFTWARE

The statistician. See 10 readings at once. Create analyses and reports.

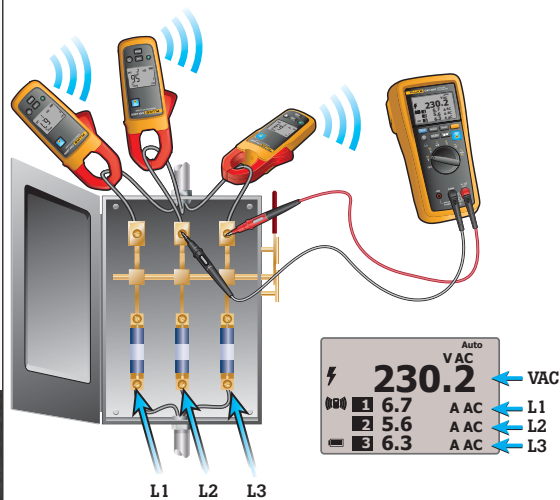

Measurement procedures

Determining current imbalance

Measure incoming current

FLUKE®

NO MORE run around

- See up to four measurements (DMM and 3 modules) on one screen, in one place at the same time
- View and analyze readings from 10 tools at once on a PC to get a complete understanding of the situation
- Set up the modules and take the readings from up to 20 meters away

NO MORE writing down

- Capture up to 65,000 sets of min/max/avg readings over single to multiple logging sessions using the recording capability

NO MORE waiting around

- Save time and money by taking multiple measurements simultaneously
- Isolate intermittent events or record signal fluctuations without even being there using the log function on the modules

NO MORE uncomfortable positions

- Set up the measurement once, step back and read it as many times as you want, when you want, from where you want.
- Increase safety by taking readings in a separate location from the point of measurement
- Fluke CNX meets measurement Category 1000 V CAT III and Category IV 600 V safety standards
