Performance

The P3 Series: Superior, not Superfluous. Fluke is how other tools are measured.

TiR27

- 240x180 IR resolution
- 43,200 total IR pixels

TiR29

- 280x210 IR resolution
- 58,800 total IR pixels

TiR32

- 320x240 IR resolution
- 76,800 total IR pixels

The greatest technological advancement in thermography may be how Fluke has made it so simple to capture images and analyze data right out of the box.

Superior image quality

Industry-leading thermal sensitivity and spatial resolution combined with a high definition display, creates the sharpest images in the industry.

One-handed, easy-to-use interface

With just a push of your thumb, go from one-handed manual smart focus to adding picture-in-picture and even add voice comments.

Torture tested™

Before a Fluke goes into your hands, we drop it from ours. Only Fluke thermal imagers are designed from the inside out to withstand a 6.5 ft drop.

Patented Fluke IR-Fusion®

(Picture-in-picture and auto blending)
Precision visible and IR image alignment allows Fluke
to offer the only on-camera blended infrared and visible
image to better diagnose issues.

Interchangeable lenses

Interchangeable wide-angle and IR-Fusion compatible telephoto lenses to cover any application.

Fluke. Not just infrared, infrared you can use.®

Building Diagnostics Building problems, defects and general maintenance.

Green Energy
Energy audit, building
inspection and
weatherization.

Moisture Detection
Restoration, water damage
and roofing.

Patented Fluke IR-Fusion® Technology

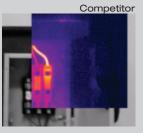

More than picture in picture

Infrared images alone can be difficult to understand, which is why Fluke pioneered IR-Fusion, a revolutionary marriage of visible and infrared images never before seen in commercial or industrial thermal imagers. Automatically capturing a visible image with every infrared image allows to you always know exactly what you're looking at.

Not all fusion is created equal

Don't be fooled by imitators. No other manufacturer can boast on-camera blending. Compare the images. Only Fluke has mastered the ability to create the industry's only transparent, perfectly blended and aligned visible and infrared images.
