

# Fluke Building Diagnostic Thermal Imagers

Models: TiR32, TiR1 and TiR

## Technical Data

High performance thermal imagers have never been this affordable. This rugged. Or, this easy to use ... until now.

We, at Fluke, are never satisfied leaving the best tools in the hands of the elite, which is why we recently added a new member to our thermal imaging family. The new Fluke TiR32 combines a powerful 320x240 sensor into the award winning, rugged design of the TiR1 and TiR, delivering the first industrial grade, high performance thermal imager. The result is strikingly crisp, detailed images that, blended with our patented IR-Fusion®, are sure to make a lasting impression on both your customers and business profitability. Don't take our word for it—see it yourself!

All Fluke thermal imagers are designed, tested, and manufactured in the USA, and feature a comprehensive two year warranty—not that you'll need it. These Fluke thermal imagers are able to withstand a 2 meter (6.5 foot) drop and meet the requirements for an IP54 rating against dust and moisture.

For added versatility and special applications, the TiR32 includes two field-swappable, rechargeable batteries. Use the optional telephoto and wide-angle lenses to bring distant and wide views into sharp focus.

## IR-Fusion® Technology, standard on ALL Fluke thermal imagers

### More than picture in picture

Infrared images alone can be difficult to understand, which is why Fluke pioneered IR-Fusion, a revolutionary marriage of visible and infrared images never before seen in commercial or industrial thermal imagers. Automatically capturing a visible image with every infrared image allows you to always know exactly what you're looking at.

### Not all fusion is created equal

Don't be fooled by imitators. Patented IR-Fusion is the only solution with physical parallax correction, enabling the perfect alignment and blending of both infrared and visible images. While many manufacturers have attempted to duplicate Fluke IR-Fusion, none have been able to match it. Turn to Fluke IR-Fusion to deliver the industry's best thermal images.
