PRODUCT BULLETIN

Bulletin No: PB313

Issue Date: 7-8-2011

Effective Date: 7-8-2011

Product Description:

Hakko HJ3100 Pre-Filter

Part No:

999-136

Specification:

DISCONTINUED

Comments:

The Hakko 999-136 Pre-Filter for the Hakko HJ3100 has been discontinued as the last remaining inventory has been depleted. With the release of the New Hakko FA-430, the pre-filter has been changed so that it is compatible with the new FA-430 and older HJ3100 units.

The new pre-filter is PN: A1585 and is sold in a pack of 10 instead of a pack of 5.

The filtering efficiency is at least equal to or better than the older 999-136 pre-filter. There is a change in size and weave of the material in order to make the filters compatible, so there is a visual difference.
