# High performance, high flexibility and high reliability.

Hitachi's new high performance installation projectors have been carefully designed to deliver high quality images in large projection environments. Featuring a convenient motorised vertical and horizontal lens shift as well as a 360 degree vertical tilt angle<sup>\*3</sup>, these new models provide outstanding flexibility. Plus, with a variety of optional lenses covering a wide range of projection distances, these innovative projectors can adapt to any available space.

## Flexible Installation

### Superior Lens Shift and Motorised Lens<sup>\*1</sup>

The intuitive motorised vertical and horizontal lens shift mechanism provides fast and efficient installation. This allows users to easily adjust images up to ±50% horizontally and up to 70% vertically, depending on the models and lenses used. This functionality is ideal for theatres and conference suites which require continuous changes to projection set-ups.

\*1. These projected images are simulations and based on models CP-X8150 and CP-WX8240 using standard lenses. Lens shift figures will vary according to models and lenses. Models using standard lens SL-702 can shift left or right up to 50% of the screen's width and down to 70% (CP-WX8240)/60% (CP-X8150) of the screen's height. Models using standard lens ML-703 can shift left or right up to 10% of the screen's width and down to 55% (CP-WU8450, CP-WU8440, CP-WX8255)/50% (CP-X8160) of the screen's height.

### Instant Stack<sup>\*2</sup>

This feature allows you to easily superimpose images projected from two projectors stacked vertically or placed side by side. This provides enhanced brightness levels and acts as a fail safe operation mode.

\*2. Please be aware that there are various cautions and limitations in functionality when stacking projectors. Ask your dealer for details.

The SL-702 and ML-703 lenses can either be a standard or optional lens depending on the projector chosen.

Optional Lens	Standard/Optional Lens
Fixed short throw lens <b>FL-701</b> Zoom: Fixed	Short throw lens <b>SL-702</b> Zoom: x 1.5
Standard/Optional Lens	Optional Lens
Middle throw lens <b>ML-703</b> Zoom: x 2.0	Long throw lens <b>LL-704</b> Zoom: x 1.7
Standard/Optional Lens	Optional Lens
Ultra long throw lens <b>UL-705</b> Zoom: x 1.7	

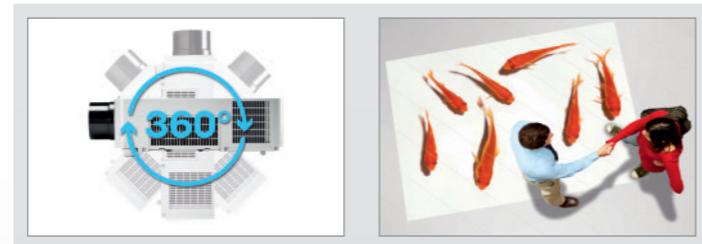

### Projection distances for lenses when projecting onto a 100" (2.54m) screen.

<b>FL-701</b>	CP-X8150: 2.1m (82.6") CP-X8160: 1.7m (66.9") CP-WX8240: 2.2m (86.6")	CP-WX8255: 1.8m (70.8") CP-WU8440: 1.8m (70.8") CP-WU8450: 1.8m (70.8")
<b>SL-702</b>	CP-X8150: 3.1m~4.6m (120"~181") CP-X8160: 2.5m~3.7m (97"~145") CP-WX8240: 3.2m~4.9m (127"~192")	CP-WX8255: 2.6m~3.9m (102"~154") CP-WU8440: 2.5m~3.8m (100"~151") CP-WU8450: 2.5m~3.8m (100"~151")
<b>ML-703</b>	CP-X8150: 3.9m~7.7m (153"~303") CP-X8160: 3.1m~6.2m (122"~242") CP-WX8240: 4.1m~8.1m (162"~321")	CP-WX8255: 3.3m~6.5m (129"~257") CP-WU8440: 3.2m~6.4m (127"~252") CP-WU8450: 3.2m~6.4m (127"~252")
<b>LL-704</b>	CP-X8150: 7.3m~12.4m (288"~490") CP-X8160: 5.9m~10.0m (231"~392") CP-WX8240: 7.8m~13.2m (305"~520")	CP-WX8255: 6.2m~10.5m (244"~415") CP-WU8440: 6.1m~10.3m (240"~407") CP-WU8450: 6.1m~10.3m (240"~407")
<b>UL-705</b>	CP-X8150: 12.4m~21.1m (487"~830") CP-X8160: 10.0m~16.9m (393"~667") CP-WX8240: 13.1m~22.3m (516"~879")	CP-WX8255: 10.5m~17.9m (415"~705") CP-WU8440: 10.3m~17.6m (407"~691") CP-WU8450: 10.3m~17.6m (407"~691")

\*3. Available on CP-X8160, CP-WX8255 and CP-WU8450 only.

### 360° Vertical Tilt<sup>\*3</sup>

These projectors can be installed vertically, giving you the ability to project onto floors and ceilings. This is especially useful for creative applications, such as shops floors, galleries and theatres.

### Lens Memory<sup>\*3</sup>

Lens memory allows you store up to 3 custom settings for lens shift position. This eliminates the need to continually adjust your settings, providing an efficient and flexible projection solution.

### Interchangeable lens options

In addition to the provided standard lens, four optional lenses allow users to select the most appropriate lens for a wide range of projection distances.

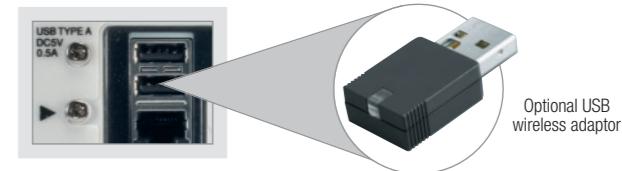

The SL-702 and ML-703 lenses can either be a standard or optional lens depending on the projector chosen.

## Advanced Network Functions<sup>\*4</sup>

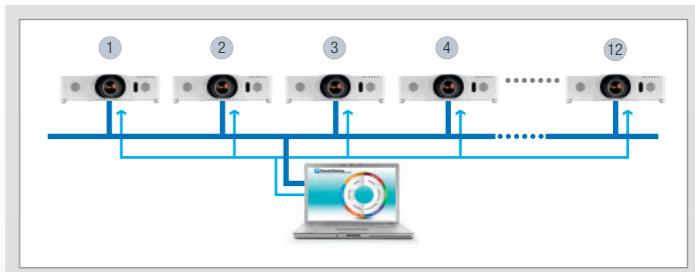

### Wireless network connection

The optional USB wireless adaptor supports all IEEE802.11b/g/n networks, and simply slots into place. This eliminates cables and provides greater flexibility when installing your projector.

### Multi projectors<sup>\*5</sup>

You can also project the same image via up to 12<sup>\*6</sup> projectors simultaneously. This is useful for meetings and lectures in large venues to allow all participants easy view of a screen.

## Usability Features

### Picture by Picture<sup>\*7</sup>

Project two pictures on a single screen – the simple, effective way to compare data, images or other content.

\*7. Available on CP-WU8440 and CP-WU8450 only.

### Perfect Fit

Perfect Fit allows quick adjustment of the projected image. Align image corners with the screen, correct barrel and other distortion.

### Status Monitor<sup>\*3</sup>

This unique feature monitors the projector and displays a status on the LCD screen located on the rear panel. This includes set up information, usage information, error messages and historical data.

LAMP	9h
FILTER	9h
SYSTEM	9h

## Easy Maintenance

The filter cover and lamp door are positioned on the projector sides, allowing easy access for parts maintenance and replacement whilst the projector is installed.

\*3. Available on CP-X8160, CP-WX8255 and CP-WU8450 only.

### DICOM Mode (for simulation)

These projectors have a DICOM Mode. While not intended for actual medical diagnosis applications, the medical industry-standard DICOM simulation mode accurately reproduces greyscale levels. It is an invaluable feature for viewing medical images such as X-rays in training and educational environments.

### HDMI connectivity

Two HDMI inputs allow digital connection via a single cable, for video and audio from various types of equipment. You can enjoy high picture quality and high sound quality from a wide range of uses, from Blu-ray to games consoles.

### More Convenient Features

- Mechanical Shutter
- Low noise level (29dB Eco Mode)
- PC-Less presentation via USB
- Display via USB
- Template Function
- Auto Vertical Keystone Correction
- AMX Device Discovery compatible
- Crestron RoomView® compatible

### Inorganic LCD panels

These projectors use inorganic LCD panels to produce clear images while ensuring longer life without fading. This means high reliability and less maintenance, reducing total ownership costs.

### Longer Lamp Life

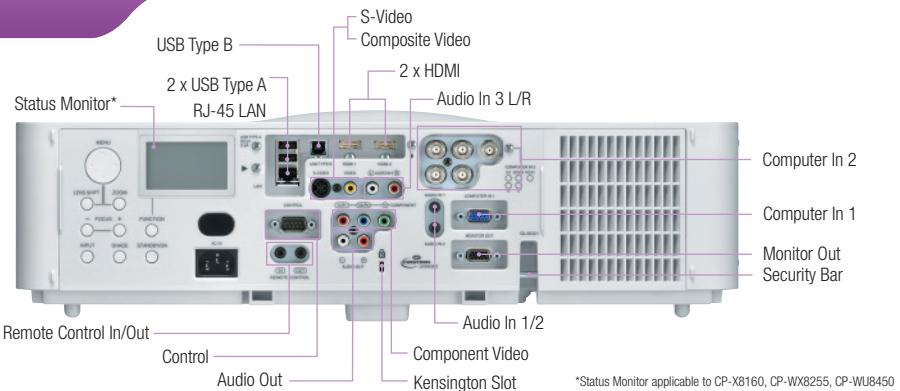

Lamp life of up to 5000 hours can be achieved in Eco Mode.

### High Performance Filter

The filter is made of two layers and lasts up to 20,000 hours<sup>\*3</sup> without cleaning, thus increasing maintenance intervals.

# Connectivity

You can connect these projectors to a variety of devices, to support all your projection needs. From DVD players, monitors and PCs, to the Local Area Network and a simple mouse connection, Hitachi has done everything possible to create the most flexible user experience. With the inclusion of two HDMI ports these projectors are capable of supporting Full HD signals from a range of devices including a Blu-ray player, perfect if you wish to watch a film on a large screen.
