PERFORMANCE VERIFICATIONS

Perform the following analysis; if the meter conforms to the limits listed in Table 1 through 5 the meter is functioning correctly. If the meter does not conform to any of the listed limits the calibration procedure must be performed.

Performance Verification Preparation

1. Turn on the calibrator, allow calibrator to warm up. Temperature stabilization should be reached after 30 minutes.
2. Remove battery cover and use a calibrated meter to ensure the batteries measure a minimum of 2.4VDC. If the batteries measure under 2.4V DC, replace the batteries (see Battery Replacement on page 9) before beginning the performance test.
3. Input the values listed in Table 1 through 5.

CALIBRATION

Calibration Preparation

1. Turn on the calibrator, allow calibrator to warm up. Perform calibration at 23±2°C (73.4°F ±3.5°F) at relative humidity of < 70%. Temperature stabilization should be reached after 30 minutes.
2. Disconnect the test leads and turn the range switch to "OFF".
3. Remove the two screws holding the case bottom.
4. Remove the case bottom using care not to damage the battery connector.
5. Using a calibrated meter ensure the batteries measure a minimum of 2.4V DC. If the batteries measure under 2.4V DC, replace the batteries (see Battery Replacement on page 9).

Calibration Procedure

It is recommended that all IDEAL meters undergo the following calibration procedure on an annual basis.

   Adjust VR3 (VR 200KΩ) until unit display reads 390.0 ± 1 digit.
4. De-energize source and remove test leads.

A AC Calibration:
61-744 ***(Refer to Figure 1B), 61-746 (Refer to Figure 2B) (Adjustments made under front panel label.)***
1. Set the function / range to the 400A AC.
2. Set output of the AC calibrator for 10.00A/60Hz +/- 0.01% and connect it to Coil = 10N = 100.0A AC.
3. Clamp the jaws to the coil = 10N.
4. Adjust VR2 (VR 1KΩ) for a display reading of 100.0 ±1 digit
5. De-energize source and remove test leads.

Calibration of the 61-740 series is complete.
Remove all leads from the calibrator and equipment.
Return unit to proper operating condition.
