IN3100 (SERIES)

Connect and project

Full functionality in a portable package. The new IN3100 series from InFocus brings big-picture quality and plug and play ease to the portable projector. Meeting set-up is now simpler than ever, with expanded network connectivity options.

With DisplayLink™, you can connect using one USB cable for content and audio transfer, and full projector control from your PC. Also HDMI 1.3, LitePort™ and a wireless-ready port gives even more connection options.

A maximum brightness of 3500 lumens, resolution of up to WUXGA (1920 × 1200) using Texas Instruments' DLP® DarkChip™3 technology, and InFocus award-winning BrilliantColor™ implementation give the IN3100 series industry-leading picture quality.

IN3114

XGA (1024 × 768) RESOLUTION
3500 LUMENS

The InFocus IN3114 offers a spectrum of connection options with high-quality projection in a portable projector.

IN3116

WXGA (1280 × 800) RESOLUTION
3500 LUMENS

The InFocus IN3116 gives presenters a full spectrum of features and options for great presentations every time.

Resolution Options

Choose from XGA (1024 × 768) or widescreen WXGA (1280 × 800) resolution. WXGA is the standard resolution in most technology devices today and has been widely adopted in business and education.

XGA
1,024 x 768 PIXELS

WXGA

InFocus lens cap slider

"We factored in customer feedback on our award-winning IN3100 series and made it even better. Better lens, audio, control, JPEG playback and integrated networking designed into the IN3100 sets a new standard for high performance meeting room projection."

Robert Detwiler
InFocus Product Manager

24/7 Non-Stop Projection

The new IN3100 series has no duty cycle limitations. It is filter-free and rated for 24/7 fail-safe operation, resulting in less maintenance and hours of worry-free use.

Low Power Consumption

The new IN3100 series is an easy choice for your wallet and the environment; with maximum brightness at full power, an eco-friendly Eco Mode will lower the power setting by 20%. While in standby mode, the IN3100 series consumes less than 1 watt of power.

Designed for Long Life

The new IN3100 series is designed to have a low cost of ownership and reliability over a long life. The IN3100's dust-resistant design means there is no filter or screen to replace, and the InFocus warranty reduces the risk of repair or replacement cost.

Clean, Installation-friendly Design

No need to remove the projector from the ceiling to check assets or replace a lamp – the new IN3100's design allows for easy access to lamp doors, serial numbers and I/O panels. In addition, the LiteTouch™ keypad gives the projector a clean look once it is installed.

LiteTouch Touchsense Keypad

The sleek backlit LiteTouch control panel provides one-touch access to the most commonly used projector functions.

Projector Management

The new IN3100 series has imbedded network services with web browser control. This projector model is also compatible with ProjectorNet™ 3.0, our free asset management software that enables you to conserve the projector's lamp life by scheduling On/Off times, presenting maintenance events and anti-theft security alerts.

Dynamic Messaging System

Send dynamic messages for instant display to InFocus projectors using the InFocus Dynamic Messaging System (DMS). This is perfect for announcements such as schedule changes, weather warnings, breaking news, and emergency notifications.

PC-Free Presentations

The new IN3100 series features LitePort, an embedded PC-free JPEG Reader that enables users to project images directly from a standard USB flash drive – no computer needed.

Plug and Project

InFocus DisplayLink technology transmits audio and video content over mini-USB, offering the simplicity of zero display setup. Easy to carry and simple to use, DisplayLink eliminates the need to toggle screens. The on-screen remote provides complete control from the PC to your InFocus projector thanks to the DisplayLink software.

Bright and Brilliant

A high brightness of 3500 lumens means the new IN3100 series is bright enough in environments with high ambient light. The InFocus BrilliantColor implementation brings rich, realistic color to any presentation.

Intuitive and Easy to Use Interface

Over 20 years of customer feedback has gone into designing the new IN3100 series best-in-class menu system. It is easy to navigate, has 17 standard languages and a unique intuitive flow.

LiteShow III™

Connect the InFocus LiteShow III wireless adaptor to any projector or other display to quickly and easily share data, audio and video over a secure wireless connection. Plus, its Moderator and Quadview features make it easier to collaborate by allowing multiple computers to connect to the display simultaneously.

LiteShow III

Security

The new IN3100 series has a Kensington® lock compatible slot along with a user assigned PIN feature for maximum security.

Optional Accessories

- Replacement Lamp (SP-LAMP-058)
- Universal Ceiling Mount (SP-CEIL-UNIV)
- Extension Arms (SP-EXTARM-01, 02, 03, 04)
- LiteShow III (INLITESHOW3)
- DisplayLink Extender (SP-DOUSB-EXTENDER)
- Wireless DisplayLink (SP-DOUSB-WIRELESS)
- Alternate Remote (HW-COMMANDER-2)
- Alternate Remote (HW-PRESENTER-RF-R)
- Projector Screen (SC-PD-80, 100, 120)
- Cables & Adapters
