

Introducing the New Mondopad and the InFocus BigTouch

Mondopad is revolutionizing how people communicate and work together in the conference room, classroom and beyond. Now with BigTouch, customers can get a true Windows 8 experience on a large scale with the ability to upgrade it to a Mondopad later this year.

The Right Tool for the Right Application

Mondopad and BigTouch are complementary products that address different requirements and specific applications.

Mondopad

- For businesses that require an integrated collaboration platform that enables video conferencing, digital whiteboard, viewing and sharing MS Office files, annotation, and more
- Also great for running any Windows application in a large touch format

BigTouch

- For customers who want to showcase Windows 8 on a large touch screen
- Classrooms, conference rooms, lobbies, kiosks, home offices and more
- Runs all Windows applications including Windows 8 apps and legacy apps
- Easy to upgrade to Mondopad with a software and hardware bundle (ETA Q2 2013)

Key Differences	Mondopad (INF5520)	Mondopad (INF5520A)	BigTouch (INF55WIN8)
Software	Mondopad software/shell		No software included
Hardware	Webcam, microphone array and sound bar included		Display only
Operating System	Windows 7 Pro		Windows 8 Pro
Other Software	Microsoft Office Suite included		No software included
Touch System	2-sensor touch system	4-sensor touch system for more accurate touch performance	
Touch Integration	2-point touch	5-point touch*	5-point touch with Windows 8 gestures
Upgrade	Not upgradable to INF5520A		Upgradable to be a Mondopad when Mondopad 1.8 software is released (ETA Q2 2013)
Price (US MAP)	\$5,949	\$6,799	\$4,899

* A customer can upgrade any Mondopad to Windows 8, but the 5-point touch optimizes the experience for Windows 8. The Mondopad shell will work in Windows 8 when Mondopad 1.8 software is released (ETA in Q2 2013).
