Comprehensive Scopes 2

Ken-A-Vision® introduces the new Comprehensive Scope 2 line –
Modern, unique, practical and reliable.

We worked with science educators in designing and developing this line of microscopes that not only provides superior image quality, but offers you features like the flip-up handle for easy carrying and ergonomic focus knobs for comfort. Go cordless or corded, and when you're done with the power cord, put it in the handy storage compartment so you don't lose it.

We offer 5 optional heads, 2 stages, and with the 4-hole reversed nosepiece, the option of adding a 100x objective lens. So you could start with a basic base model with a monocular head and standard stage and later upgrade it with a Seidentöpf binocular digital head and a mechanical stage. Whatever your need or budget, we'll provide you the right solution.

Features

Digital models: T-19541C and T-19641C include Applied Vision™ 4 Software

Optimized total cost of ownership

Rechargeable NiMH batteries

5 optional modular heads

Protective surface guards

10x wide field eyepiece(s)
