MirrorBoard *– Q300*

Make Any Projector Interactive

The MirrorBoard brings the power of interactivity to any projector by giving you the flexibility to control digital content from anywhere in the room. Whether you are projecting a lesson in a classroom or making a presentation in a corporate conference room, you'll have control of your content. The MirrorBoard connects wirelessly with your computer (with a range of up to about 30 feet) and "mirrors" your computer desktop on a 10.1-inch active matrix screen of the device. You control the cursor with the included battery-free pen, with the same control that you would have if you were sitting in front of the PC.

Features

- Active matrix TFT LCD technology
- 10.1-inch screen
- WSVGA 1024 x 600 resolution
- Wireless Ultra-wide band
- Battery-free pen
