Digital Projectors & Copyboards

DIGITAL PROJECTOR

## Selection Guide

PLUS has a complete offering of digital projectors, ranging from the ultraportable, palm-sized V-Series to our low-profile, exceptionally bright U7-Series of conference room projectors. The ingenuity of PLUS is to design projectors with all of the desired capabilities of a larger machine in a compact size and sleek form – and then take it one step further by introducing next-generation features that make PLUS projectors truly outstanding.

A TEXAS INSTRUMENTS TECHNOLOGY

### FEATURES AVAILABLE ON PLUS PROJECTORS

**Advanced Color Wheel** • PLUS's unique ACW preserves brightness while allowing for superlatively enhanced color reproduction and astoundingly clear picture quality.

**Dual Color Mode** • Vivid Mode for color reproduction optimized for digital and moving pictures; Dynamic Mode for optimized brightness. Switch between them easily with one touch of the DCM button on top of the projector or from the remote. (V-339)

**Unplug & Go** • The "Unplug & Go" feature makes for a fast getaway by cooling down the lamp after the projector has been unplugged. This not only saves time, but also lamp life (especially for those who don't like to wait before they pack and stow their gear). (V-332, V-339)

**Wireless Presenting** • Using a CF-type wireless LAN card makes it possible to transmit images from a PC to the projector without the use of cables. In addition, wired network capability allows the use of the projector via a company's internal network. (U4-237, U7-137)

**PC-Free Presenting** • Internal Image Viewer makes possible the projection of image files stored on CompactFlash™ or USB memory. Notes and ideas written on PLUS's M-Series Copyboards can also be projected on the large screen by storing the written data on the CF card. (U7-137) (U4-237 ~ CompactFlash™ only)

**Eco-Mode** • By projecting with approximately 20% less brightness, the power consumption and cooling fan noise can be reduced and the lamp life lengthened (by as much as 50%).

**Short-Focus Zoom Lens** • This lens allows for the projection of a 60-inch image from a distance of just over 5 feet. Ideal for the small boardroom or classroom. (U5-632)

**RGB Output Terminal** • Allows you to connect a separate external monitor to your projector. (U5-512, U7-Series)

**Auto Adjustment** • Automatically tunes the RGB phase, clock frequency, and resolution to achieve the optimal image.

**Line-Doubling** • I-P conversion makes possible even smoother reproduction of video images.

**Digital Keystone Correction (vertical)** • Image skewing resulting from a screen that is out of vertical alignment with the projector can be corrected digitally.

**Presentation Timer** • Indicates the remaining presentation time on screen, and allows you to manage time without keeping an eye on your watch.

**Security Password** • Projectors can be set to require the input of a password thereby protecting against tampering and theft.

### 2 lbs Palm-Sized

These sleek and compact XGA projectors are designed to travel. The V3-131 is a mere 1.38 inches thin! The V-332 and V-339's "Unplug & Go" feature saves time and prolongs lamp life. The V-339 sports Dual Color Mode for truly vibrant color when presenting digital video.

## Additional Accessory Options

### AirProjector Wireless Adapter

A wireless system makes controlling your presentations easy. Improve the effectiveness and productivity of your presentations and meetings by connecting multiple computers to a single projector.

### Electronic Copyboards

PLUS copyboards allow you to save and distribute your notes either digitally or printed to paper. Features include PC connectivity and built-in CompactFlash™ memory, as well as black-and-white and full color printing.

### Presentation Screens

Choose from a variety of portable and wall-mounted presentation screens from PLUS. Projection screens are specially optimized to give you the best image possible.

### Remote Controllers

Take control of your presentations with state-of-the-art wireless controllers and keyboards. Utilizing revolutionary new technologies, you can gain new freedom during your presentations.

### Shipping and Carry-On Cases

Keep your projector safe from the rigors of travel with an ATA-Certified shipping case. Or take your laptop and projector on the road in a single hand case.

### Eimo Visualizers

Present 3D objects via a PLUS projector with a state-of-the-art Eimo visual presenter. Both still and moving images are displayed with exceptional clarity. An indispensable tool for many presenters.

### Ceiling Mounts

Easily mount your projector to your ceiling, wall, or angled wall. All components are made to the highest quality specifically for PLUS.

### Spare Lamps

Keep an extra on hand, just in case the unexpected happens.

**Remote Control**  
Ultra-Portable, full function, card type.

**Remote Control With Mouse Function**  
This remote control can be used to operate a personal computer mouse. It is also equipped with a laser pointer function.
