

InSync Transport Case For iPad Mini

16-bay Case
Item # 53-5800-1-C34-110

30-bay Case
Item # 53-5820-1-C57-110

The **InSync Transport Case for iPad Mini** is a versatile, portable and durable solution to charge and synchronize your collection of Apple iPad Mini devices in a neat, compact footprint. Compartments are large enough to accommodate the devices with a range of slimline cases or covers. This solution comes in two sizes to support 16 or 30 devices.

Using your own Apple dock connector cables, manually connect each iPad Mini to the built-in USB ports. To charge, plug the case into any standard wall outlet (110v to 240v). The illuminated ON/OFF switch shows green when devices are charging. To sync iPad devices, open iTunes and tether your laptop to the case using the supplied USB 2.0 cable. Also supports wireless syncing to iCloud.

With built-in wheels and an extendable handle, these cases roll effortlessly between locations. Designed to be shipped safely, the durable exterior withstands inclement weather and the rigors of the road. To protect devices from impact stress, a dense foam insert has a dedicated spot for each device and for added security the case can be locked with padlocks.

SPECIFICATIONS

Item #: 53-5800-1-C34-110A
Weight (empty): 25 lb (11 kg)
Dimensions: 25 x 20 x 9" (65 x 51 x 24 cm)
Input Voltage: 110-240 VAC
Charges and syncs 16 devices
