Introducing the ALL NEW QClick QRF 900!

The QRF900's sleek design is easy to handle and extremely functional. Its full color backlit display is pleasant to the eyes and makes on screen information easy to read. Instructors will find the new QRF900 easy to use and the built in laser pointer and wireless mouse will allow the instructors to engage their students with dynamic training and testing.

The teacher remote can directly communicate with student remotes without a computer via radio frequency.

Simplified for Students Questions right on their screen!

With questions on screen, teachers can send complete quizzes as homework to student remotes. Teachers can also create ad-hoc quizzes for their students on any content enabling spontaneous, interactive instruction.

Dynamic answering allows students to punch in alpha-numeric, multiple choice, and true/false answers. The familiar cell phone like interface is easy for students to navigate and makes homework fun!

Enhanced Software Features

The QClick software suite features modules to set up a class, create exams, manage hardware communication, take exams and produce reports. With one click, convert existing Power-Point presentations into a QClick exam. Choose between many different modes including standard quiz, homework, rush quiz, elimination, vote, ad-hoc, hand raise, and roll call. Save time and effort by seamlessly managing exams without making copies and tedious grade work.

Grade book reporting aggregates scores based upon defined terms and periods using numerical or letter grades. Customizable definitions such as grade book composition, weight factors, and more, provide instructors with the ability to create unique and specialized reporting options.

• Instructors can easily measure student performance individually, by class, or by subject.

• Reports can be exported in various formats including Rich Text Format (RTF), PDF, and Excel. Reports include: tracking student progress, analysis per question, academic summary, and report card.

• Merge multiple sessions to allow testing of the same subject for different student groups.

• QClick software ensures data integrity and security.
