QD 3300 Visualizer
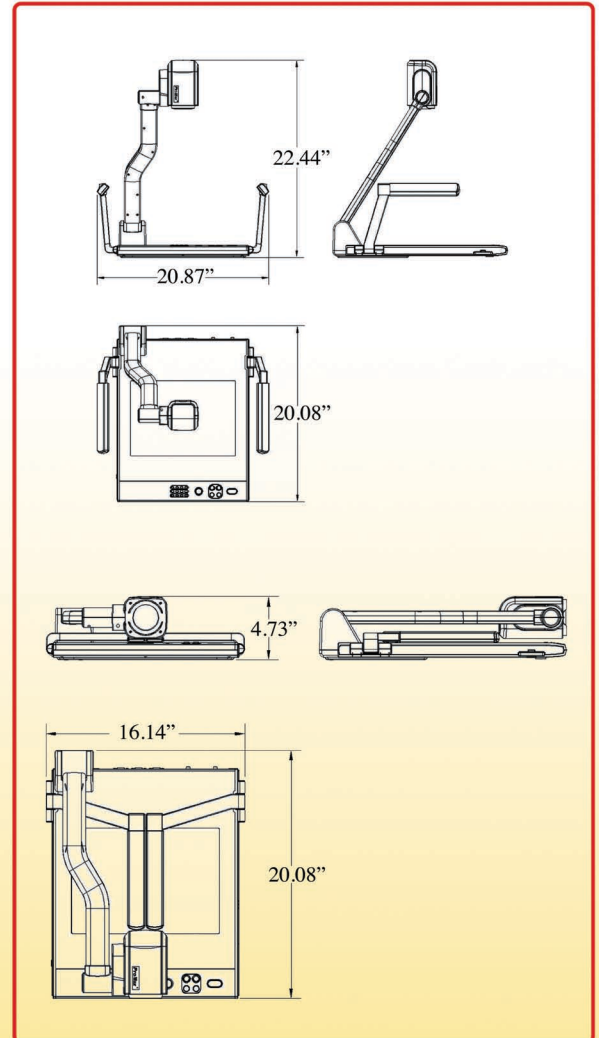

A full size visualizer at an affordable price!

Highlighted Features

- The QD3300 from QOMO HiteVision is the most cost effective, full size Visualizer on the market! Its CMOS camera delivers crystal clear images and sharp text.

- The QD3300 uses a high speed USB connection for image capturing and video recording. The unique plug 'n play USB system means no drivers are necessary and it will interface with Mac's, PC's, as well as 3rd party software systems allowing you to build curriculum and seamlessly interface with any interactive product.

- The full size stage, lit by LED lights provides a versatile work surface allowing you to show your documents and 3 Dimensional objects with ease.

- The QD3300 provides a full A4 back lit stage allowing you to show your transparencies and X-Rays. With the special negative feature, you can even show your photographic negatives in positive form!

- Presentation features such as freeze, image rotation, and title capture enrich your presentation experience.

- Systems users will appreciate the switching and RS232 controls built into the QD3300; allowing the control of multiple devices from one location.
