NEVER LOSE THE TOUCH
QOMO Multi-Touch Monitor QIT600

E A S Y W O R K E A S Y L I F E

The all-new QOMO embedded in-cell multi-touch panel leads monitor technology into the era of large screen multi-touch. QOMO integrates core technologies of panel and IC design to provide the most ergonomic methods of operation in your work and life!

Collaboration

- During meetings, multiple people can edit a document at the same time using multi-touch.
- Engineering drawing is more intuitive and smooth, making work more efficient.

Handwriting Recognition

- Words can be written directly with the stylus or input with a virtual keyboard.
- Unique palm rejection technology allows the screen to become your working desktop, without the awkwardness of writing with your wrist in the air. Use for extended periods of time with ease

Document Reading

- The screen can be used upright or horizontally in coordination with your reading habits; adjust the angle any way you want.
- Lines and notes can be marked directly and quickly on documents.

Parent-Child Interaction

- Families can draw together and have double the fun.
- Draw directly on the screen, and enjoy the immediate effects.

QOMO Exclusive Technology

The embedded in-cell touch panel developed by QOMO has built-in photo sensors on the array substrate of the LCD panel. This makes extra add-on glass and other components unnecessary and increases screen brightness and image texture. Experience the world's largest 21.5" multi-touch monitor with Full HD right now! This panel featuring the highest quality and the most ergonomic operation will bring you unprecedented comfort.

OS Support: Microsoft Windows 7 / Vista / Windows XP
(Only Windows 7 Home Premium * above editions support multi touch)
