SEAWARD

When you're PAT testing we're there with you.

70 years' development and innovation comes good. Introducing the world's most effective PAT testing solutions.

Seaward is a total solutions provider, in every way.

We have developed a comprehensive range of PAT testing solutions which can be used by electrical safety technicians at every level: a one-stop shop providing for every PAT testing eventuality.

Seaward PAT testers are designed to let you work with the maximum of ease and efficiency and are backed with a huge range of accessories, printers, asset management software and even training courses and guidance booklets.

And to make the process of PAT testing more efficient, Seaward testers are available either individually or as part of a handy, pick-up-and-go solution kit that promotes a more efficient way to work.

As a Seaward user, you will have access to support and resources that are second to none, including helpful literature, periodicals, guidance notes, lively forums and indispensable case studies. Our customers benefit greatly from the competitive edge our innovation gives them and feel reassured that we're just a phone call away, with hands-on help when needed.

Welcome to Seaward Total Test Solutions.
Welcome to a smarter way to PAT test.

Downloadable Test Kits
The total solution for PAT professionals.

Our downloadable PAT test kits are at the forefront of their field. Technologically advanced, they're designed to make PAT testing easier and more efficient.

For professional technicians, they offer a total solution, incorporating tester, software, accessories, printers and labels.

And, of course once you've bought Seaward, the back-up and aftercare is indispensable. Seaward's range of PAT testing kits is designed to cover all eventualities and easily meets all relevant regulations and standards.

Take a look!

Supernova Elite Advanced PATSolutions Package
Carry out any test with this dual voltage PAT with flash test and memory for results storage.

The rugged Supernova Elite is a comprehensive tester. It does anything you need, including flash tests, RCD trip time testing and it has dual voltage capability.

Kit Contents (323A910)
- Supernova Elite
- PATGuard Elite 2 software
- PATGuard support contract
- Connectors
- Test n Tag printer
- Barcode scanner
- Calibration certificate
- Guide to PAT Testing

Kit also available as separates
Kit also available without software

Ideal users:
Construction industry, Manufacturers, Hire companies, Universities, Colleges

Europa Plus Advanced PATSolutions Package
The portable PAT tester with a big memory.

This tester tests any appliance and even performs in-situ earth bond and touch current tests while the tested equipment remains plugged in - saving even more time.

Kit Contents (324A910)
- Europa Plus
- PATGuard Elite 2 software
- PATGuard support contract
- Test n Tag printer
- Connectors
- Barcode scanner
- Tester case
- Calibration certificate
- Guide to PAT Testing

Kit also available as separates
Kit also available without software

Ideal users:
Universities, Colleges, Electrical Contractors, Facility Management

PrimeTest 350 Advanced PATSolutions Package
The must-have tester for PAT professionals.

The 350 speeds up testing, with wireless communication and batteries that charge in the unit. It does everything you need to meet the IEE code of practice revisions.

Kit Contents (345A913)
- PrimeTest 350
- PATGuard Elite 2 software
- PATGuard support contract
- Carrying case
- Test n Tag Elite printer
- Bluetooth Laser scanner
- PAT CheckBox
- Battery charger
- Test lead and adaptors
- Guide to PAT Testing

Manual Test Kits
All-in-one, pick-up-and-go PATBags for manual recording.

Seaward's manual PATBags contain everything needed to perform safety tests with total accuracy and speed. Each is brimming with high quality accessories, software, training, guides and invaluable resource material. The bag itself is handy too, featuring helpful pockets for tools and labels.

Uncompromising on features and simple to use, the range features three models. The PrimeTest 50 and 100 are testers suitable for simple testing regimes where a pass/fail mechanism and a measured value are required for manual record-keeping.

For those with more demanding test requirements, the PrimeTest 250 is built for easy use but has test features which are second to none. It includes the same 3 phase and RCD testing features as any of the most advanced, downloadable testers. Its only difference is that it doesn't record test results.

Each of these PAT testers is available as part of Seaward's new, all-inclusive PATBag kits, or can be purchased separately.

PrimeTest 50 PATBag

A simple-to-use handheld safety checker with Pass/Fail indicator.

Light, rugged and portable, the PrimeTest 50 has a simpler range of tests than some of its Seaward cousins. Just choose the test you need. The easy-to-read display will give pass or fail test results. PATGuard Elements software is available as part of the PrimeTest 50 PATBag.

Kit Contents (345A930)
- PrimeTest 50
- PATGuard Elements software
- Durable, purpose-made PATBag
- 110V adaptor
- Training DVD
- Guide to PAT Testing
- Reference card
- Business Builder CD
- PAT log book
- 500 pass & 500 fail labels

Kit also available as separates
Kit also available without software

Ideal users:
Guesthouses / B&B's, Landlords

PrimeTest 100 PATBag

A simple-to-use handheld safety checker with actual test readings.

The PrimeTest 100 is an extremely easy-to-use PAT tester. Like the PrimeTest 50, it performs Class I, Class II or IEC lead tests at the press of a button - then it offers a measured value test result which can be recorded using PATGuard Elements software (included in the PrimeTest 100 PATBag).

Kit Contents (345A926)
- PrimeTest 100
- PATGuard Elements software
- Durable, purpose-made PATBag
- 110V adaptor
- Training DVD
- Guide to PAT Testing
- Reference card
- Business Builder CD
- PAT log book
- 500 pass & 500 fail labels

Kit also available as separates
Kit also available without software

Ideal users:
Maintenance staff, Care homes Schools & Colleges, Leisure industry

PrimeTest 250 PATBag

Easy-to-use. Tackles every job, fast - even 3 phase testing.

Hand-held, portable and battery powered, with advanced features but simple-to-use. The lightweight 250 carries out all electrical safety tests required by the IEE Code of Practice. PATGuard Elements software is also available as part of the PrimeTest 250 PATBag.

Kit Contents (345A928)
- PrimeTest 250
- PATGuard Elements software
- Durable, purpose-made PATBag
- 110V adaptor
- Training DVD
- Guide to PAT Testing
- Reference card
- Business Builder CD
- PAT log book
- 500 pass & 500 fail labels

Kit also available as separates
Kit also available without software

Ideal users:
Electrical Contractors, Facilities Managers & Maintenance staff, Schools & Colleges, Leisure industry, Hotels

Pass/Fail Labels

Long lasting, endurable test labels.

Our range of durable, high quality labels are perfect for our manual testers and allow for clear test identification.

NEW Rhinotags

Virtually indestructable and ideal for use in demanding environments. Supplied in a resealable blister pack with an indelible pen.

Manual Labels
- Rhinotags (x 100) (91B309)
- Pass labels (x 500) (91B038)
- Fail labels (x 500) (91B311)
- Barcode test code labels (x 240) (194A308)
- Barcode appliance No. labels (x 250) (194A307)

PAT Testing Software
A vital part of the PAT testing process.

In any test regime, using the correct PAT software is of huge importance. Some of our testers are designed for those who prefer recording results manually. Others offer automatic connectivity to record-keeping software, making it easy and efficient. Our software packages allow for complete traceability and give you the ability to put test information onto a PC or laptop directly, via download and wireless information transfer.

With Seaward, you can choose from a range of PATGuard software that meets all the requirements of all types of PAT regimes: from manual testing and record keeping (by an in-house tester working in a care home, for example), through to sophisticated, professional testing for the most specialised testing assignments (where results are stored in large databases).

In addition, a PATGuard support contract is available which ensures you receive quality, technical support when using your PATGuard software.

As always, Seaward's experience and understanding of the tasks PAT technicians face means that the software we make is not only easier to use, but also more intuitive and faster. All part of our total solution.

Printers and Labelling
Smart technology. Easy-to-use and small. Makes your job easier.

Seaward supply some of the most technologically advanced label printers in the world. They're tough, portable and a joy to use. And they all download test results directly from the tester, allowing results to be transferred from the tester to label in a matter of seconds. We also supply a range of tough, versatile labels that are compatible with every one of our printers.

Test n Tag Kit
(308A915)

This unique system is one of the quickest, hassle free and portable PAT labelling systems around. The Test n Tag Kit comes with a printer, label cartridge, barcode scanner and carry case.

Use with all downloadable Seaward PAT testers for a completely automated PAT labelling process.

Printer and label cartridges are also available separately.

- Test n Tag printer (308A924)

Compatible Labels
- Test n Tag label cartridges (black/yellow) (308A914)

Test n Tag Elite
(339A970)

Handy and hard wearing. This ultra-portable printer is made from impact-modified polycarbonate and fused oil, and has an abrasion resistant rubber overmould (six foot drop protection). Featuring smart battery management to monitor battery for longer life and performance. Labels are tamperproof, waterproof and professionally printed with your logo and barcode. Compatible with PrimeTest 350 PAT tester.

Compatible Labels
- Test n Tag Elite labels (x 180) (339A041)

Desk Test n Tag Printer
(312A912)

Prints professional tags that won't tear, fade and are tamperproof. Comes with a roll of tags, printer ribbon and PC software disc. Compatible with Supernova Elite and Europa Plus.

Compatible Labels
- Desk Test n Tag labels (white x 1000) (312A951)
- Desk Test n Tag labels (orange x 1000) (312A954)
- Desk Test n Tag labels (yellow x 1000) (312A956)
  Desk Test n Tag labels (blue x 1000) (312A957)
- Desk Test n Tag labels (red x 1000) (312A961)
- Desk Test n Tag ribbon (312A952)

Bluetooth Thermal Results Printer
(339A930)

Suitable for use with the PrimeTest 350. With Bluetooth technology, it transfers test results directly from tester to printer, allowing a test result record to be printed immediately, either to leave with your client or for your own reference records. Can also print results labels.

Compatible Labels
- Bluetooth Thermal label roll (x 5) (339A310)

Supernova/Europa Thermal Results Printer
(283A954)

Ideal for use with the Supernova Elite and Europa Plus printers, this battery-operated and lightweight thermal printer is perfect for printing test results either to leave with your client or for your own reference and records.

Compatible Labels
- Supernova/Europa Thermal Printer label roll (x 5) (283A964)

9

Accessories
The most comprehensive range of accessories available.

Seaward's comprehensive range of accessories is designed to complete the PAT testing process and is yet another demonstration of our total solution in action.

We know every job is different. We've listened to the people we've worked alongside and brought their insights back to our R&D department. We have designed a range of accessories which cover off all eventualities and environments. It all makes the job easier and more efficient.

Adaptors

Our range of adaptors enable additional functionality to many of our testers.

NEW NTB-1 RCD isolator (372A953)
Use with any RCD tester to prevent tripping the main RCD.

NEW 3 Phase leakage adaptor (391A910)
Enables leakage testing on 3 phase machinery, plant and equipment with the PrimeTest 250.

- **230/110V adaptor** (270A076)
- **110/230V adaptor** (281A075)
- **3 Phase adaptors (Delta 4 pin 16A)** (209A910)
- **3 phase adaptors (Star 5 pin 16A)** (209A911)
- **3 Phase adaptors (Delta 4 pin 32A)** (209A912)
- **3 Phase adaptors (Star 5 pin 32A)** (209A913)
- **USB / serial adaptor** (356A950)
- **CCD scanner adaptor** (339A960)

Verification Units

Our verification units allow performance checks to be carried out on test equipment to ensure accurate measurement between calibration intervals.

- **PAT Checkbox** (227A910)
  A safe, simple and quick means of checking the calibration of PAT testers to ensure accurate testing.

- **PowerCheck 1557** (369A910)
  The only comprehensive PAT and installation instrument verification tool in one rugged, drop proof enclosure.

Test n Tag Accessories

Our Test n Tag accessories allow for wireless connectivity between your tester and printer.

- **Test n Tag Printer Adaptor (K3000)** (342A910)
  Allows your K3000 Test n Tag printer to be used with the PrimeTest 350.

- **Test n Tag Printer Adaptor (K3100/K3110)** (342A914)
  Allows your K3100 / K3110 Test n Tag printer to be used with the PrimeTest 350.

Scanners

Speed up the test process with barcode label scanners for rapid entry of appliance number test code and asset details.

- **Bluetooth Scanner** (339A923)
  A portable ID laser scanner with Bluetooth interface.

- **CCD Scanner** (194A922)
  Lets you input and access asset information quickly. This scanner connects directly with the tester.

- **Bluetooth CCD Scanner Adaptor** (339A960)
  Turn your Seaward Electronic CCD scanner into a Bluetooth ready tool with this simple adaptor.

11

Accessories

The most comprehensive range of accessories available.

Memory

Brain Cells are a revolutionary method of storing information. They allow a large amount of data to be stored, read and updated by the PAT tester.

- **Braincells Read/Write Reader** (288A910)

- **Braincells Self Adhesive Tag (50) (**288A953)

- **Braincells Cable-Tie Tag (50)** (288A954)

Power

Our batteries and battery charger allow for quick and easy battery charging for use with Seaward battery powered test instruments.

- **NIMH batteries & battery charger**
  (339A950)
  Recharge anywhere between 2 and 8 NiMH or NiCd batteries at a time. Included are high quality NiMH batteries for use with any Seaward battery-powered tester.

- **Seaward PT-01 NiMH battery charger** (356A003)
  A replacement battery charger for the PrimeTest 350, which allows the batteries to be charged while still in the tester.

Leads

Our range of leads enable additional functionality to many of our testers.

- **USB / serial port adaptor** (356A950)
- **Supernova parallel printer lead (**283A953)
- **Supernova / Europa serial printer lead** (283A955)
- **Thermal printer lead** (283A960)
- **Supernova dual serial port Adaptor** (283A972)
- **Supernova / Europa PC downloadlead 9-9 way** (194A919)
- **Supernova / Europa PC download lead 9-25 way** (194A920)
- **Supernova / Europa earth test lead** (249A908)
- **Primetest lead – fixed crocodile clip** (347A002)
- **Primetest – probe with detachable clip** (305A950)
- **Supernova Elite flash probe** (44B101)

On the move

We are always looking for ways to simplify the process while you're on the move and our handy accessories below can help.

Carry cases
Our useful carry cases are a secure and handy way to transport our testers.

- **Europa Series carry case** (270A951)
- **Supernova Elite carry case** (298A950)

Portable Appliance Register and Test Record (998A223)
A handy A5 booklet which allows a handwritten record for 3 sets of test results for up to 210 appliances.

Modem Kit (283A969)
Allows PAT test results to be transferred from the field to a remote PC running a suitable terminal program in a matter of minutes.

Training, Resources & Servicing

We are here to help.

PAT Training DVD and online exam
(998A104)

This new DVD features full-length demonstrations and detailed animations explaining PAT testing principles, electrical safety tests, legislation and code of practice. The DVD also includes a FAQ's section, answering commonly-asked questions. An online exam and a personalised, printable certificate showing you've passed are included.

The DVD divides into interactive chapters so you can navigate from section to section until you've understood each subject fully and you're ready for the exam.

Web Forums

Go to www.seaward.co.uk and you'll find some very busy and helpful forums. Ask a question about a particular aspect of the Seaward test equipment you're using (or even a more general electrical safety query) and you'll receive helpful advice from a number of fellow users, as well as expert Seaward technical staff. It's amazing how much useful information is just a mouse-click away!

Publications

We produce a number of useful publications for the PAT testing industry to help and advise both PAT testers and their customers.

■ **Current Knowledge**
Technical articles, industry news and events. Available at www.current-knowledge.com

■ **Seaward Guide to PAT Testing**
Guidance for carrying out PAT testing.

■ **Seaward Common Sense Approach to Electrical Safety in the Workplace**
Helps make sense of your PAT testing obligations. Ideal for those responsible for electrical safety in their organisation.

■ **Seaward PAT Educational Posters**
Guidance posters for PAT testing. (17th Edition posters also available).

Tech Support

You can get Seaward technical support in a number of ways. Through our Knowledge Base, (FAQs) at www.seaward.co.uk/knowledgebase/
Please try to find your answer here first.

Our Application Notes (www.seaward.co.uk/downloads.asp) provide answers to your more detailed questions about operating Seaward PATs, Installation testing, EMC and LVD. Or try our forum!

Or from our Tech Support Line, call 0191 587 8718 or email support@seaward.co.uk

PATGuard Support Contract
(296A917)
This contract ensures you recieve quality, technical support when using your PATGuard software. Call us for more information on 0191 586 3511.

SEAWARD
Experts in what we do.

Calibration

Consistent, effective and reliable test instrument operation is especially important. Our highly-trained service and calibration team have vast experience and expertise and regular re-calibration of your equipment will give you total peace of mind. Most equipment can be calibrated on-site, or returned to base for turn round within 5-7 days from receipt and payment confirmation or purchase order (account customers only).

For details please contact:
On-site
onsite@seaward.co.uk
or call 0191 587 8706

Calibration
calibration@seaward.co.uk
or call 0191 587 8736

Repairs

Repairs to your Seaward equipment are carried out by highly trained engineers with the experience and expertise to repair a vast range of test equipment. We use the latest diagnostic tools to isolate your problem and solve it to the highest of standards.

Spare Parts

Our service department provides strong product support to customers who carry out their own maintenance on their test equipment.

We stock an extensive range of spare parts. Please call us for part numbers, price and availability and we will be happy to help.

The numbers to call are 0191 587 8737 or 0191 587 8739, or you can email service@seaward.co.uk

Service Contracts and Extended Warranty

We offer a variety of fixed-price contracts. These range from an annual calibration-only contract to a completely inclusive one which incorporates all repairs and servicing.

Our Annual Calibration Contract
This contract will help you identify any faults with your equipment. It includes all readings and adjustments, it increases the life of your equipment and improves efficiency.

Extended Warranty
This contract covers all standard repairs. It includes a yearly calibration and allows you to budget the service and calibration costs of your equipment.

If you'd like more infomation about our service contracts or extended warranty, please contact service@seaward.co.uk or call 0191 587 8737 or 0191 587 8739.
