

ēno goes mobile

Get interactive whiteboard power right in your hands.

ēno mini lets you create and deliver engaging lessons from anywhere in the classroom.

ēno mini is the mobile companion to the ēno interactive whiteboard and offers all the same features, benefits and environmental certifications, but provides even more flexibility. Teachers can magnetically detach ēno mini from a ceramicsteel surface and move freely about the room.

Using the same revolutionary Bluetooth®-enabled stylus, teachers and students can effortlessly collaborate on lessons by simultaneously using up to three styluses on ēno mini slates and ēno interactive whiteboards.

Even without an interactive whiteboard, ēno mini can transform any classroom with a projector and computer into a dynamic and interactive learning environment.

Features

- Multi-user input—up to three users can simultaneously interact on ēno mini and/or ēno interactive whiteboards
- Durable—rugged grip surface is virtually indestructible and can withstand the rigors of any classroom
- Slate has no battery to charge and no electronics to fail
- Ergonomic design—comfortable to hold and lightweight
- Antimicrobial product protection—prevents bacteria and fungal growth on the surface of the product*
- Convenient storage—attaches magnetically to any steel surface including most markerboards and chalkboards
- Environmentally certified—Cradle-to-CradleSM Silver and SCS Indoor Advantage Gold certified
- Low total cost of ownership—sharing the stylus with an ēno interactive whiteboard lowers total cost. Identical user interface between ēno mini and ēno interactive whiteboard also minimizes training expenses
- Forever Warranty™—durable and long-lasting ceramicsteel surface that lasts a lifetime

Create and deliver engaging lessons from anywhere in the classroom with ēno mini.
