

HA1

Hermetic Compressor Analyzer

ANALYZES AND TESTS HERMETIC COMPRESSORS

- 3 Ranges of 250V AC
- Dual voltage operation
- Indicates continuity and ground faults in motor windings
- Free locked rotors by reversing motor action
- Convenient breakout jacks for measuring voltage and resistance

HA1 • Hermetic Compressor Analyzer

The HA1 analyzes and tests hermetic compressors at up to 25 amps of running current. Connects directly to the compressor motor eliminating the refrigeration system start capacitor.

The HA1 has the following features:

- 3 ranges of 250 VAC starting capacitors between 88-301 MFD
- Dual voltage operation of 120/240 VAC
- Indicates continuity and ground faults in motor windings with LED lights
- Free locked rotors by reversing motor action
- Convenient breakout jacks for measuring voltage and resistance
- One year limited warranty
