

Weller®

Designed for real work

Introducing the first micro torch engineered for performance and durability...
the Weller® ML100 Magna-Lite.

COOPER Hand Tools

To do real work, you need real tools.

The Magna-Lite from Weller is the first butane micro torch designed for real work. Even though it weighs just 1.3 ounces and is less than three inches long, the Magna-Lite generates a 2400°F/1,300°C flame that lasts for up to a total of 25 minutes on a single charge of fuel. That's enough energy to thaw frozen locks, seal the ends of synthetic rope, contract heat-shrink tubing, and perform countless other tasks around the home, shop, boat, or campsite. The Weller Magna-Lite is also one of the few products in its category to be reviewed and approved for consumer safety by the Consumer Products Safety Commission.

Translucent body makes checking fuel level easy

Adjustment dial lets user control flame height and level of heat output

Quickly refillable using standard butane fuel (Weller WB1 or similar)

Spring-loaded cap flips open the moment trigger is pressed, providing additional wind protection; snaps closed securely

Electronic igniter Trigger activates fast, reliable piezo ignition and LED work light

- Recessed nozzle for reliable ignition and added safety
- Integrated bright blue LED illuminates when trigger is pressed; improves visibility in low light situations
- Convenient keychain lanyard
- Childproof safety trigger

The Magna-Lite Torch comes in a durable and eye-catching hanging clamshell package.

The sturdy and attention-getting tray pack holds eight clamshell packages securely and looks great from any angle.

Heat Shrink Tubing

Fusing Synthetic Rope Ends
