

Weller®

Grab a Fistful of Power

Introducing the ML200 Magna-Lite...a table top torch
with the power to take on the big jobs.

COOPER Hand Tools

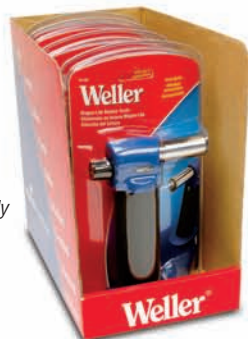

A powerfully compact performer.

The ML200 Magna-Lite Table Top Torch from Weller is proof that big things come in small packages. With a mid-setting run time of 60 minutes and a powerful, wind-resistant 2,500° F flame, the ML200 is perfectly suited for soldering and brazing, heating and bending thin metal, loosening frozen or rusted nuts and bolts, and many other uses around the home, shop, boat, or campsite. An easy-to-use slider control regulates the length of the flame and the amount of heat applied. An ergonomically designed textured rubber grip fits comfortably in the hand for maximum control. The ML200 also features a built-in stand for hands-free use and is CPSC-approved for safety.

The Magna-Lite Torch comes in a durable and eye-catching hanging clamshell package.

The sturdy and attention-getting tray pack holds four clamshell packages securely and looks great from any angle.

- Refills in just 20 seconds using standard butane fuel (Weller WB1, or WB2)
- Child-resistant safety trigger Consumer Products Safety Commission (CPSC) reviewed and approved
- Textured rubber grip for comfortable control
- Handy portable torch for industrial maintenance, tool and die shops, automotive repairs, and more
