AVerVision CP130

Portable Document Camera

folded view

Product Description

The AVerVision CP130 is a high value portable document camera including the a new flexible and portable design. Producing high quality images, the AVerVision CP130 also includes essential features for classroom presentation and demonstrations. The 8 times zoom allows users to clearly point out particular details. Up to 40 images can be captured to the internal memory, or both images and video and audio can be saved to a PC or MAC with the included software and USB cable. The built in LED light adds lighting to virtually any environment while optional adaptors allow most microscopes to be attached.

network sharing and annotation software

included enhanced annotation features with the ability to share live presentations over a local area network

FlexArm portability

patented FlexArm design increases portability while adding protection to the camera head

saving images

40 jpg

capture, store and retrieve up to 40 JPEG images directly to the document camera

affordable

high image quality with essential features in one affordable solution
